Smart cities and communities

MATJAŽ ŠTEBLAJ, general manager

SRIP SMART CITIES AND COMMUNITIES

03-07-2018

What is a smart city ?

What is normal city ?

What is stupid city ?

IQ test for cities ?

SMART CITY

**“Smart Cities will be
the next generational leap forward for mankind,
as was the Industrial Revolution and the Cavemen
before Christ with flint to make fire.”**

T. Tomita

**“We as the people
and the community as a whole
need to smarten up and get smarter
before jumping up and down
about Smart City”**

FOUNDERS OF PMiS

SRIP Smart Cities and Communities is coordinated by **Jožef Stefan Institute**, the leading Slovenian research organization

Other cofounders :

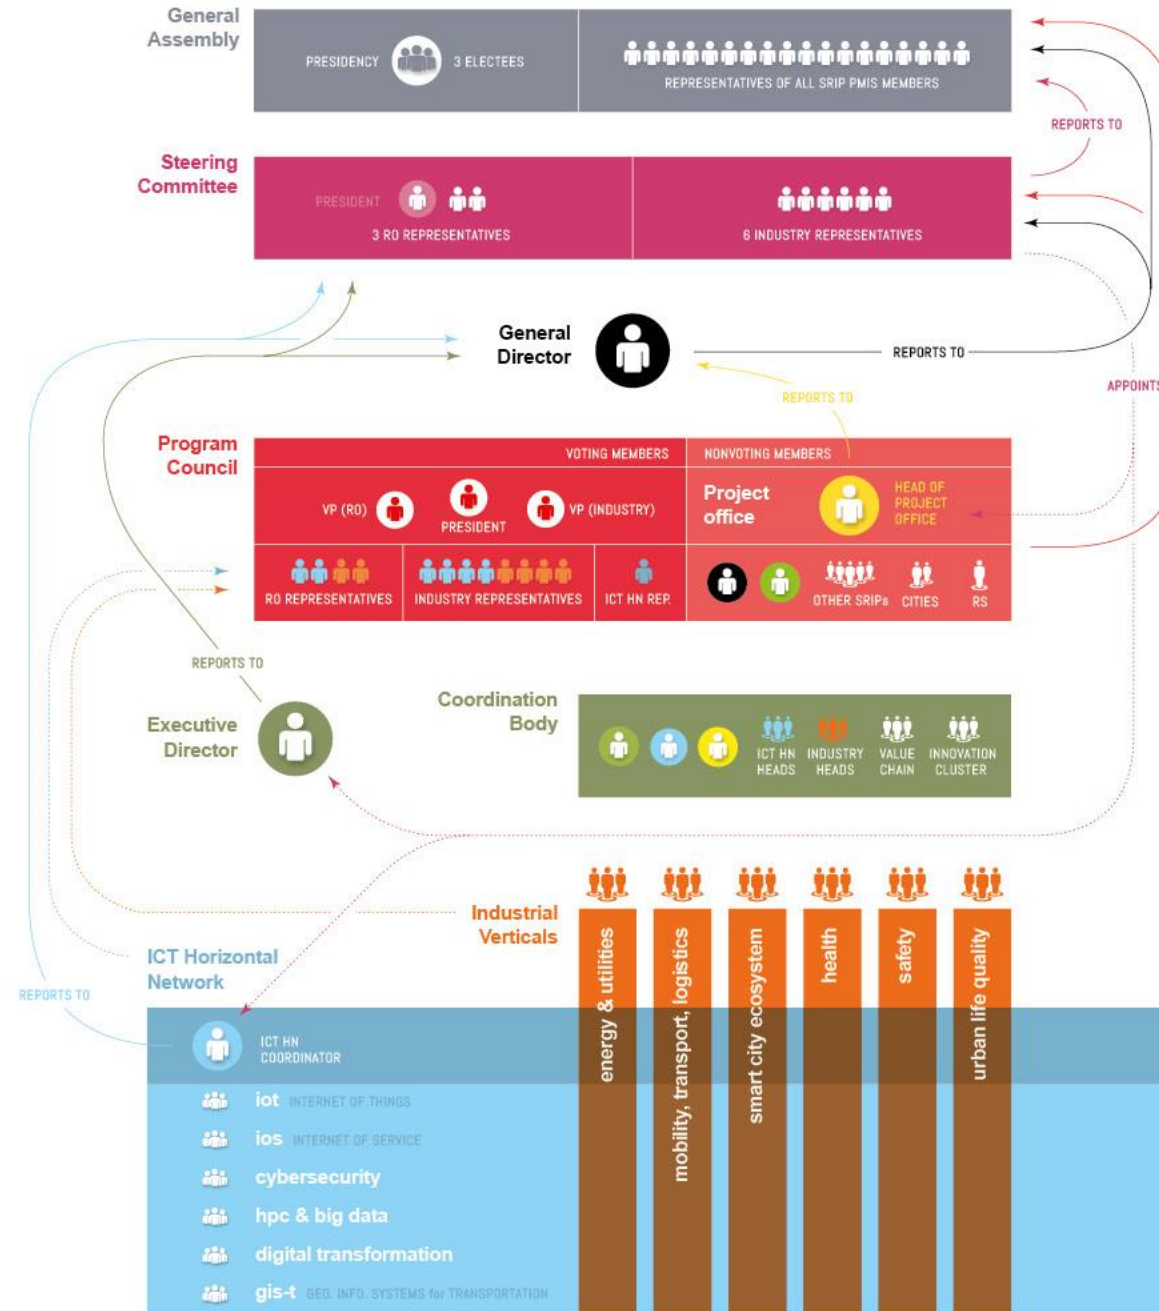

University of Maribor,

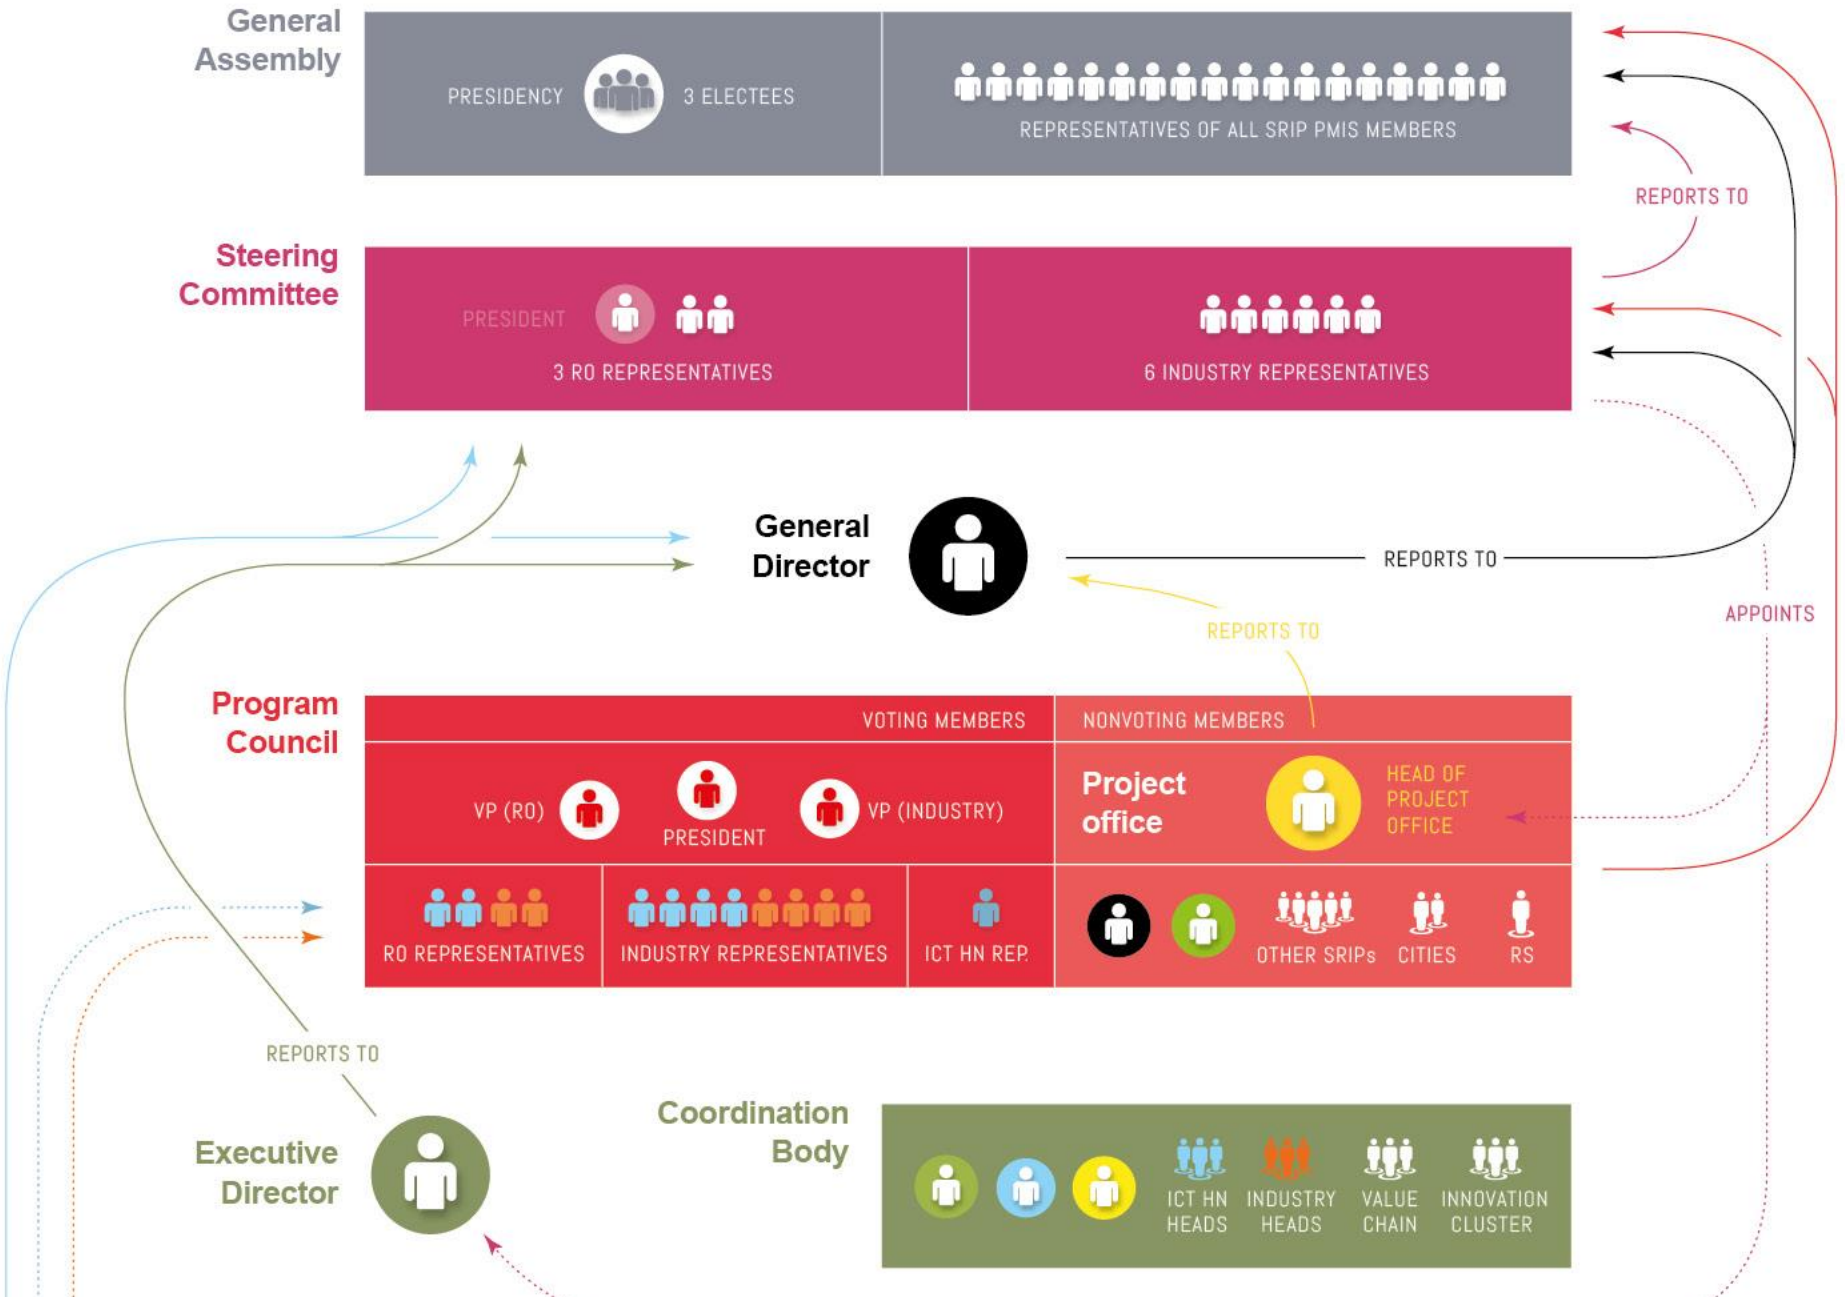

University of Ljubljana,

Chamber of Commerce and Industry of Slovenia and

Six different technology areas gathered under Horizontal ICT network (Cybersecurity, Digital transformation, GIS-T, HPC and big data, IoS and IoT).

MEMBERSHIP

**Over 140 members,
ranging from micro
to large companies**

OUR MISSION

SRIP Smart cities and communities will create and support synergies between business and research in developing and selling new solutions and products for improving the quality of life in the cities.

OUR MISSION

Within SRIP Smart cities and communities we will collect Slovenian research and innovation knowhow and experience from relevant industrial and academia and highlight priority “breakthrough” areas of new products, technologies and services.

OUR MISSION

Its penetration on the global market with concentration on niche areas will put Slovenia among the prominent European providers of such solutions.

Thank you
