**9 Stakeholders Meetings**  
(140 direct participants)

**1 Thematic Seminar**  
(40 stakeholders)

## Cuantitative KPIs:

**1** Action plan (regional scope)

**1** Modified program from Piedad Isla & Juan Torres Foundation which will apply the identified best practices

**5** Identified best practices (approved by Interreg Europe managing authority)

**9** Policy learning events

**23** People improved their professional skills thanks to their participation in interregional cooperation activities.

**29** Press appearances

**> 300** Readers of our CD-ETA news each semester.

All Actions Plans are using Structural funds.

- Our Action Plan (Castilla y León Action Plan) partially uses **ERDF funds**.

## Cualitative KPIs:

- Increased **awareness of the challenges** related to the digitization of natural and cultural heritage.
- Higher effectiveness of the applied **digitization policies** in our region.
- Improvement of the **adoption of ICTs** for preservation and promotion of Cultural and Natural Heritage. Better understanding of costs and multiple benefits for reaching the expected impacts.
- New acquired knowledge about how to bring together all the **different actors** (private and public) for the implementation of the programs at regional level.
- Exhaustive effort to **apply the lessons learned** in the development of the Action Plan.

## Horizontal principles

- Equal opportunities
- Gender equality
- Sustainable development
- Digital agenda for Europe

We shared the results of the interregional study visits and the identified best practices with general public at rural and urban level.

# OBJECTIVES OF THE ACTION PLAN

- **Promote the digitization** of the documents of the Archives in order to **make their query available** to interested people through the [Digital Library of Castilla y León](#), thus guaranteeing the preservation and access to digitized units.
- **20% increase in the impact** of the actions and initiatives projected **through the** Portal of Archives of Castilla y León **web** and Social Networks, as a platform for the development of synapses between citizens and archives.
- **Work in a coordinated manner** with the different public authorities units to get the archival community of Castilla y León in the forefront of document management and archives.
- Develop a **new professional profile** that includes both the development of transversal skills and a specialization in technological skills.
- Strengthen the quality and efficiency of the services offered by the archive centres, guaranteeing transparency and accessibility.

# ACTION LINES

# 1. Consolidation of the Archive System

## / New professional profile

- It is the most advanced part of the Action Plan. The management of archives has been streamlined thanks to the implementation of the Comprehensive **Electronic File Management System (SIEGA)** in the archives managed by the Regional Authority, and it allows their compatibility with those archives managed by all **national** public authorities.
- The new professional profile is being promoted by the regional public authority to meet all digitization challenges regarding archives.

## 2. Increase the Documentary Heritage of Castilla and León

- Among other actions, the **Historical Archive of the Mining of Castilla y León** is being developed. It will gather a documentary heritage of incalculable value to learn about the history and context in which mining was developed in the north of Castilla y León region.

### 3. Dissemination of digital heritage

- The impact of the actions and initiatives projected through the websites belonging to the **Castilla y León Archives Portal** and **Digital Library of Castilla y León** has increased by more than 20%, as well as their influence on Social Networks.
- The number of new users of the different websites has been significantly increased.
- The influence of COVID-19 has also been an element to take into account for the increase in citizen participation and online consultation of files.

## 4. Digitization of documentary collections

- A strong impulse has been given to the **digitization of the documentary collections of the Archives** of the region in order to make their consultation available to interested persons through the Digital Library of Castilla y León, thus guaranteeing their preservation and access to the units digitized.

## 5. Aggregate information and digital value to listed Cultural Heritage elements

- A new Portal about **Digital Romanesque** was presented last month. This website has served as one of the **pilot cases** for the implementation of the Action Plan. Thanks to this new tool, the available information about the **BICs (Assets of Cultural Interest)** of Castilla y León region has been enriched making all the digital related resources available.
- It is an example of private partnership between Telefónica and Santa María la Real Foundations.

## Self-defined performance indicator: 3 new initiatives related to e-culture

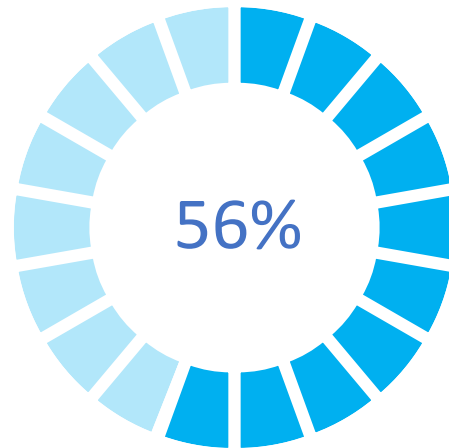

promoted by our Foundation:

- Incorporation into the **Amazon e-commerce platform**, for the sale of books about cultural heritage.
- **Blockchain technology** adoption to our Monitoring Heritage System, in order to provide high security services.
- 1 webinar and 1 online workshop about **Cultural Landscape** and its digitization needs.
