

### #eBussed

eBussed supports regions in the transition towards low-carbon mobility and more efficient public transport in Europe by promoting the use of e-buses.

## Fruits of thematic work

*The eBussed working groups have collected and produced information from their thematic perspectives. In this newsletter, you can find articles, reports and a video containing information on the themes and good practices to be utilised in e-bus deployment.*

*Welcome aboard!*

## Thematic reports

### Drivers & Barriers, Readiness Indicators and Good Practices for e-bus deployment

Ready for e-bus deployment? The report is based on *Drivers and Barriers in e-bus deployment*, and it is well worth reading!

Familiarize yourself with the Readiness Indicator Tool that signals the region's readiness status and read the concise list of topical good practices and an assessment of their transferability to other regions.

### Technological requirements

This easy-to-read report contains good practices from the field of *Technological*

requirements.

If you could use further information on the vehicles, IT infrastructure, data collection, charging infrastructure and technology, operation management, depot architecture, grid requirements and electricity production, this report is for you.

## User interface

Covering topics such as driver education, driver and passenger experiences, passenger perceptions and uncertainty of drivers, *User interface for e-bus deployment* takes the policy learning one step further and sheds light on regional similarities and differences in practices that have been found functional and worth spreading.

## Supporting the procurement and tendering of e-buses

*Procurement and tendering of e-buses* focus on the themes of interest to all regions planning on e-bus deployment.

Business models, value chains of public transport, public and private companies, ways of tendering and financial aspects are at the core of the report.

## Training for the whole staff

Once the e-buses have been purchased, it must be decided who should be trained to ensure safety and economical driving.

As one solution, this video presents a Good Practice from Turku, Finland.

## New thematic articles

## eBussed articles

The eBussed library contains a growing number of articles on electric buses from many different perspectives.

The newest article focuses on the crucial role of driver training in the deployment of electric buses.
