# THE PROJECT

**RFC aims at the sustainable revitalisation of heritage buildings by improving the coexistence of fortified cities and neighbouring forts in urban regions. There is a high number of former fortresses and fortified sites of big historical value in Europe, established at different times.**

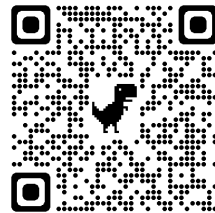

**This fortified heritage defines the image of today's landscape and the struggle and war around these cities define the current borders of municipalities, regions, countries and Europe. But in many cases such constructions are neglected, some derelict, some presented as historical monuments, or only partly utilised. In the majority of cases, they are fragmented and there is a problem to maintain them as this requires big financial investments and strong cooperation.**

# GOOD PRACTICES

A Good Practice is defined as an initiative undertaken in one of the programme's thematic priorities which has already proved successful and which has the potential to be transferred to a different geographic area.

- Since August 2019, RFC partners have been working in this process, which concludes now, when we move from sharing ideas to creating action plans
- Here you have all the Good Practices shared during this period of time.:

# TERUEL'S DISSEMINATION EVENT

The Provincial Government of Teruel hosts for 2 days the RFC partners, from the Czech Republic, Belgium, Romania, Slovakia and Germany for the starting point for the Action Plans.

The Action Plans, focused on improving the cooperation of Cities and Fortresses in their preservation from an environmental point of view, set up on know-how reached and shared by the project partnership.

The first day will focus on the dissemination of the RFC project action plans, while the second day will deal with the second thematic workshop on policy improvement.
