STAKEHOLDER ENGAGEMENT REPORT

CCDRC, Centro Region 11.01.2022

Stakeholder event, semester 5, Working on Cross-Regional Synergies

During the fifth semester, CCDRC, HWWI, Fryslân and Veltha worked on the possible arrangement of a Pilot Action to finance interregional synergies to promote the transition toward a circular plastic.

Several meetings were organized, involving key stakeholders coming from the different regions to discuss potentials and capabilities for circular economy in the plastic sector, exploiting the complementarities among the regions.

The online stakeholder meeting took place on January 11th, with roughly 10 participants representing key stakeholders from the different regions, active in circular plastics.

The discussion allowed the REPLACE partners to collect valuable insights to be used for the definition of the aspects of the possible Pilot Action.
