Stakeholder event, semester 6, Working on Cross-Regional Synergies: Exploring interregional synergies in the Textile Sector

During the fifth and sixth semester, Lodzkie, North East Romania Development Agency and Advisory Partner Veltha worked on the exploration of cross-regional synergies in the RIS3 sector Textile, with the aim of highlighting interregional opportunities for cooperation among local stakeholders in promoting the transition toward a circular economy in the sector.

Following the methodology developed by REPLACE project, the exploration of cross-regional synergies in key sectors within the partnership is structured through the organization of several meetings, with a significant contribution of stakeholders coming from the different regions and active in the sector, with the aim of discussing potentials and capabilities for circular economy in textile to exploit complementarities.

The online stakeholder meeting took place on February 2nd, with roughly 10 participants representing key stakeholders from the different regions, active in the textile sector.

The discussion allowed the regions to describe their sectoral expertise in the textile sector, highlighting complementarities and possible areas for cooperation.
