REPORT OF THE DISCUSSION

Discussing the outcome of the Circular Benchmark Tool with regional stakeholders.

For ENGAGEMENT: in-person interview

CONCLUSIONS

Until now, CBT had mainly been discussed in the REPLACE consortium and beyond with other European regions. The aim of this discussion was to explore the extent to which the tool could also be used within the province of Fryslan itself by various parties in the public sector. The conclusion is that the CBT is particularly suitable for use at the overarching provincial level, and that municipalities and the province together can use the tool for the development of joint policies on circular economy.
