# Policy instrument

## **IROP** IROP (Integrated regional operational programme)

- Training of regional stakeholders on IROP calls
- Implementation of MOMAr good practices into Interreg AT-CZ project
- Submission of a new project to IROP, utilizing knowledge and good practices from MOMAr project

# History

## In the end, the submission of an IROP project was selected for the Action plan

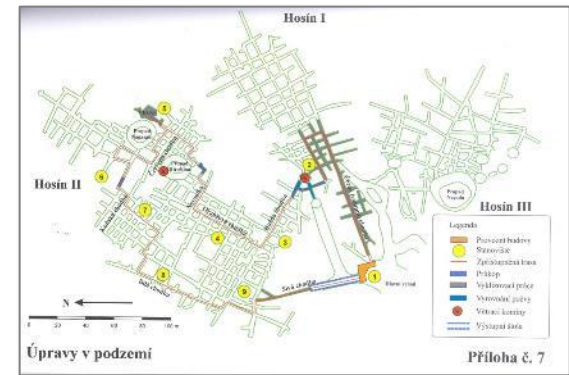

- Project is called Re-opening of the Orty site for visitors
- Orty is an old china-clay mine in the vicinity of the regional capital of South Bohemia – České Budějovice
- The project includes not only opening of the mineshafts but also visitor centre adjacent to it

# Implementation

## As of March 2023, the situation with the project is as following:

- The architecture contest was set up for the final appearance of the visitor centre
- The results are expected in April 2023, currently the proposals are being evaluated. Evaluation process is not public.
- RERA prepares the feasibility study for the project and will be responsible for submitting it into appropriate IROP call

# Implementation

## As of March 2023, the situation with the project is as following:

- Initially, it was planned to be submitted as a part ITI initiative (Integrated Territorial Investment) in South Bohemian region
- It hasn't materialized, other project were prioritized to be included in the ITI call
- The project is going to be submitted into a regular IROP call (non-ITI).
- However, the regular call is slightly delayed, pushing the date of submission beyond the end of MOMAr project

# Implementation

## However...

- Knowledge and expertise gained within the MOMAr project will be utilized in Orty project, although later than expected
- The staff of RERA and of several stakeholders took part in project activities, leading to their increased capacity in innovative approaches towards management models of rural heritage

# Implementation

## However...

- The knowledge and trends from MOMAr project will be exploited in other projects, too. As an example, a project for a visitor centre in Trocnov monument includes ideas and solutions from MOMAr project.

# Thank you!
