ECOMUSEUM BATANA

dr. Tamara Nikolić Đerić

Project manager

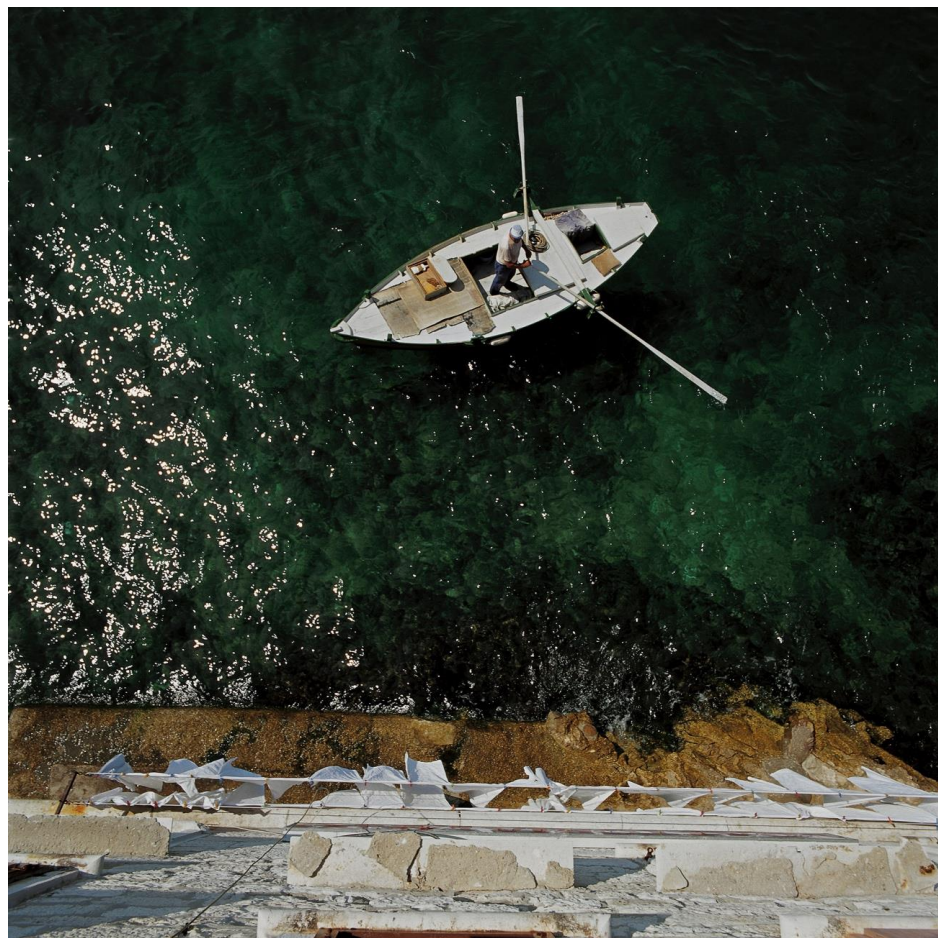

Ecomuseum Batana

Cagnes sur Mer

| 27th October 2022

ABOUT US

- A community project addressing the need to safeguard Rovinj's local maritime heritage with special attention to its boatbuilding tradition
- Along with boatbuilding tradition, the Ecomuseum Batana focuses on safeguarding accompanying cultural elements such as local dialect, traditional fishing techniques, gastronomy and *bitinada* singing

ABOUT US

- ❖ The mission and main goals of Ecomuseum Batana are conveyed and implemented through its principal elements:
 1. The House of Batana, the central interpretation and documentation centre with a permanent exhibition;
- ❖
 2. Spacio Matika, local tavern, the place to experience the tastes, smells and the singing of the local maritime heritage;

ABOUT US

- ✿ 3. Mali Škver (Little Shipyard), the place to celebrate the proces of batana's construction
- ✿ 4. Rovinj's regatta (known simply as Regata) with lateen and
- ✿ 5. The Batana Way from the Mail Mol (Little Pier) to Spacio Matika and Rovinj's waterfront, two thematic routes – the first by sea accompanied by barkarioli (boatmen), and the second a stroll along the waterfront.

DIGITAL TECHNOLOGY IN TRANSMITTING TRADITIONAL KNOWLEDGE

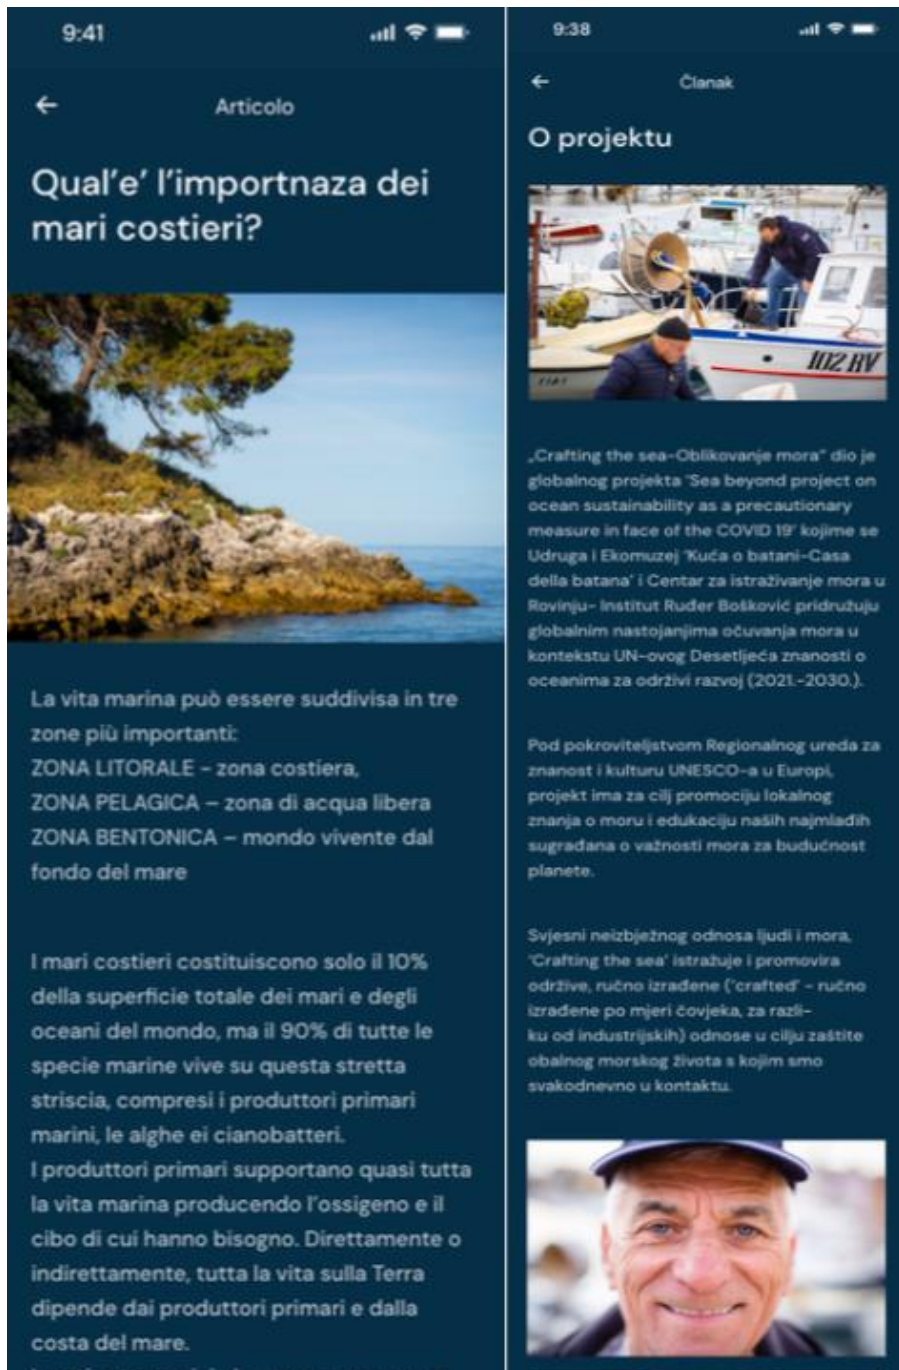

Based on its Development Strategy (2016-2020) the Ecomuseum Batana focused its activities in transmitting traditional knowledge to younger generations. Among different activities two digital project were developed:

1. iEcomuseum – new technologies in documenting and interpreting ICH for children

- iPad app on local fairy tales promoting storytelling as medium for transmission of knowledge / combining new and traditional media

The new Ecomuseum's Strategy (2020-2025) aims at addressing the environmental challenges of coastal areas emphasizing the cultural dimension of sustainability

Crafting the sea is a multidisciplinary 15-month project aimed at:

1. identifying local knowledge (Intangible cultural heritage) on marine life of the Rovinj's archipelago, a NATURA2000 area
2. Analysing part of the 100-years old scientific archive (Centre for Marine Research Institute Ruđer Bošković)
3. Developing participatory climate-change and biodiversity monitoring and evaluation systems
4. Educating children and young decision makers to understand, acknowledge and promote marine (coastal) bio/cultural diversity as source of life

The project is financed by UNESCO Regional Office in Venice and PRADA

Thank you for your kind attention
