# Policy improvement: Rome's Energy Office Managing Board

**Raffaella Fomini**  
Città Metropolitana di Roma –  
Capitale Lavoro

**Interreg  
Europe**

European Union | European Regional Development Fund

# Structure and aims of the OFFICE

Within the INTERREG SUPPORT project the Metropolitan City of Rome (MCCR) strengthened its support provided to local municipalities by creating an ENERGY OFFICE MANAGING BOARD

# Structure and aims of the OFFICE

MONITORING SEAPs/SECAPs implementation

PROMOTING the use of a web platform to gather data on energy consumptions of public buildings

FACILITATING the exchange of energy efficiency-related data

Elaborating feasibility studies for the implementation of JOINT ACTIONS

Organizing CAPACITY BUILDING events for municipalities

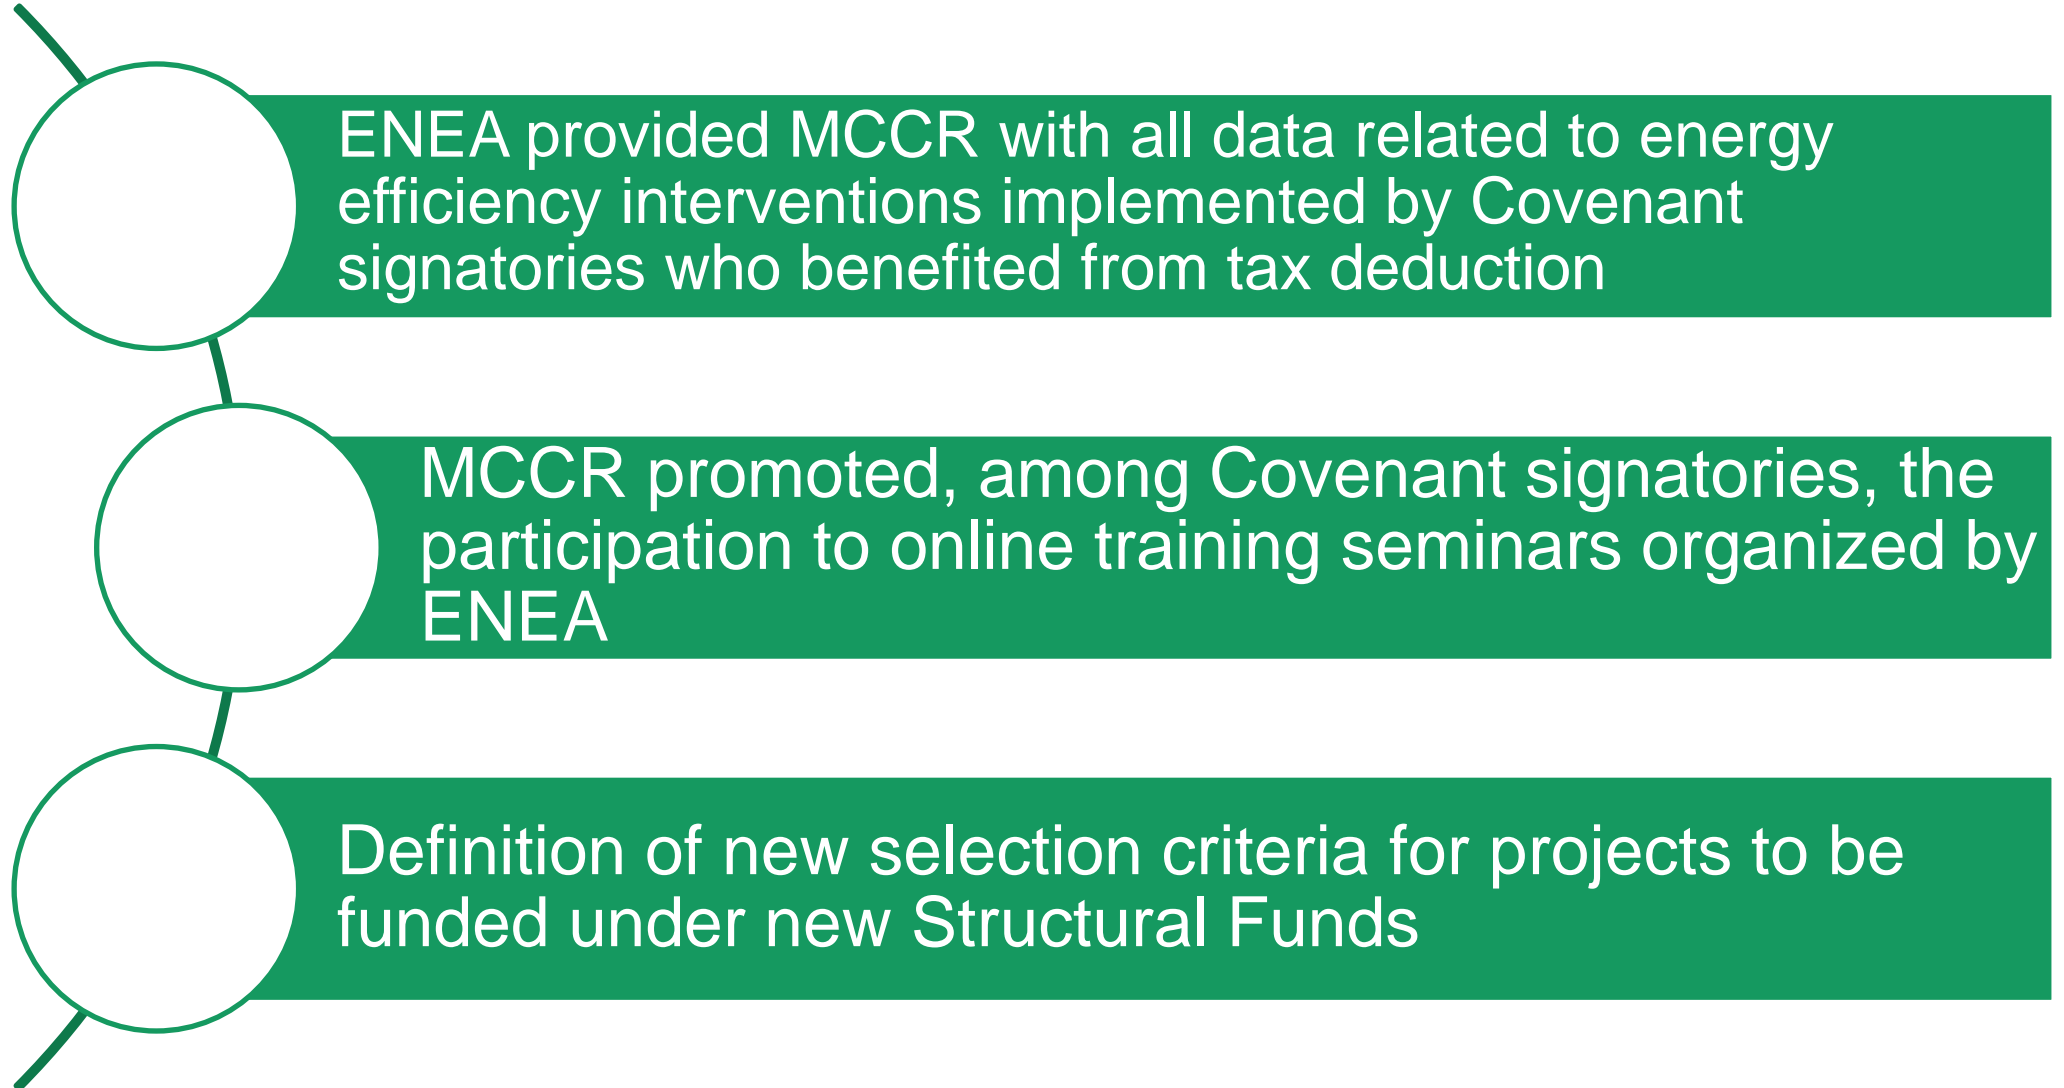

# Results achieved

# Results achieved

# The web platform on energy data

All members of the Energy managing board have an interest in improving the web platform which has become a **showcase** for data sharing and the design of **joint actions**.

The screenshot displays the Interreg Mediterranean ENERJ web platform interface. At the top left, the logo for Interreg Mediterranean ENERJ is visible. A search bar is located at the top right. The main area is a map of the Rome region, showing various locations like Marino, Albano Laziale, and Velletri. Several data points are marked on the map, with some highlighted in green and numbered (6, 7, 9). A legend on the right side of the map allows users to select data, with 'Buildings' checked and 'SEAP Actions' unchecked. On the left side, there is a list of locations with their addresses and a 'Sort' button. The URL 'www.enerj-platform.eu/enerjwm/#' is visible at the bottom left.

# Future developments

**Develop the web platform - detailed reports, comparison between buildings, aggregated reports at local level for different consumption sectors**

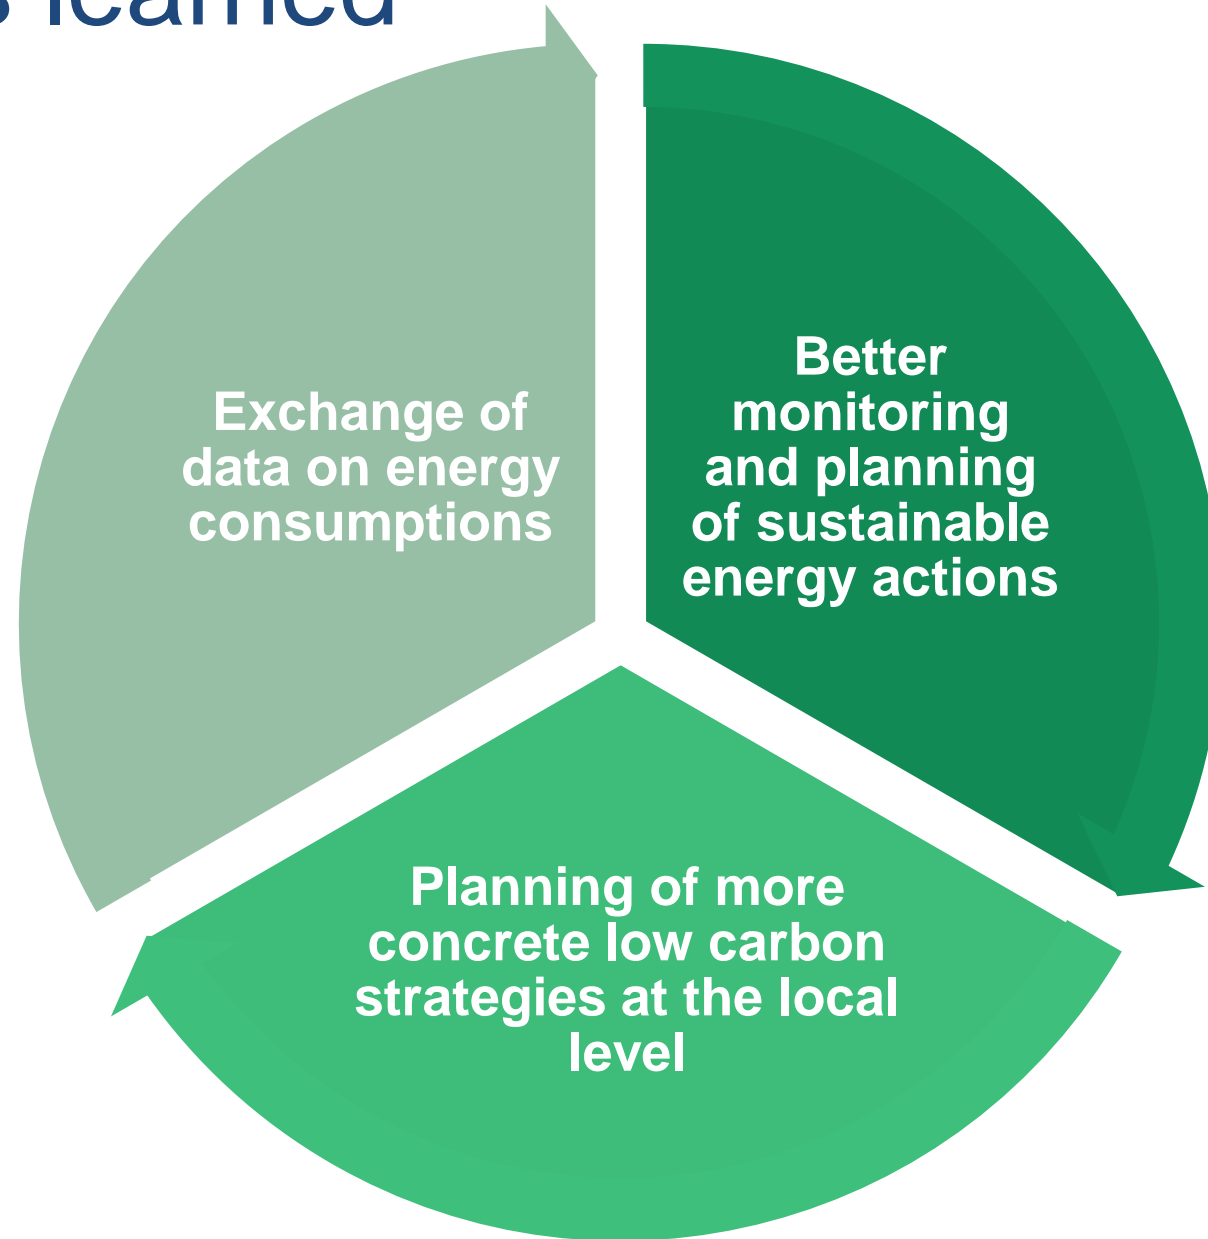

**Encourage agreements with public service managers for data retrieval and strengthen collaboration with other**

**Create a one stop shop supporting Municipalities in implementing their SECAPs**

# Lessons learned
