# Overall situation in Slovenia

There should be a better mechanism for co-ordinating activities in telecare and telehealth within and between government directorates, research organisations, the (health)care services and SME's.

27 January, 2017 | 1st International thematic workshop - Madeira

---

# Policy instrument

## SELECTED POLICY INSTRUMENT

- **Operational Programme for the Implementation of the EU Cohesion Policy in the Period 2014-2020**
- **OP is managed by:**
  - Government Office for Development and European Cohesion Policy (Managing authority for the OP).
  - Ministry of Labour, Family, Social Affairs and Equal Opportunities (Intermediate body for the relevant thematic priority axis).

## STRATEGIC FOCUS OF POLICY INSTRUMENT

The relevant thematic priority axis covering also home care is “PA 9: Social inclusion and poverty reduction”. This PA is related to one of the general objectives of OP, i.e. “reducing the number of socially excluded persons and persons at the risk of poverty while increasing the access and quality of community-based services and promoting social entrepreneurship”.

# Quadruple helix model

## LEVEL OF UTILISATION OF QUADRUPLE HELIX MODEL

Quadruple helix model is not well utilized in Slovenia in the field of home care. While there have been some initial attempts by the policy-makers to mobilize and coordinate different stakeholders, these have not been fully utilized.

The Ministry of Labour, Family, Social Affairs and Equal Opportunities established in 2016 a working group for e-care, the task of which is also a launch of a national ecosystem in the field of e-care. Apart from involvement and co-organisation of the launch of a Slovenian ECHAlliance ecosystem no activities have been conducted since the establishment of the mentioned working group.

A network called Healthday.si is a community of health-tech companies and organisations from their supportive environment, based in Slovenia. Since they were formed in 2014 they have organised 7 large events, covering also the topic of home care.

The Strategic partnership for development and innovation mechanism (slo. SRIP) is a comprehensive practice of the quadruple-helix approach in a form of a government mechanism
