City of Espoo

Espoo innovation School as a Service gains international recognition

UNESCO has awarded Espoo as a Learning City that rises to the challenges of the changing environment with new ideas for reason. In Espoo, school can be a versatile service and a set of resources for learning, it comprises different kinds of learning environments and presents new grounds for novel pedagogical approaches - without the limitations of just one dedicated building.

The Regional Council of Päijät-Häme

BIOREGIO - Boosting circular economy of biological streams in European regions

The South Finnish region of Päijät-Häme (Lahti Region) is leading a new Interreg Europe project: "BIOREGIO - Regional circular economy models and best available technologies for biological streams". Together with eight partners from six different countries, BIOREGIO desires to influence regional policies and enhance the bioeconomy. The five-year long project started in January and the first international joint workshop will take place in Lahti in April this year.
