

Media Release – B2Green – 30.03.2017

The European project REBUS for the energy upgrade of the buildings of the Municipality of Hersonissos

The strategy and the goals he has set as an active member of the Covenant of Mayors for the energy upgrading of his buildings was presented at the 3rd meeting of the partners of the European project REBUS at the beginning of March, in Malmö, Sweden, of the Hersonissos Municipality. Participates as a member of the Local Stakeholder Forum.

Sophia Yfanti as Energy Manager and representative of the Municipality of Hersonissos once again developed the successful pilot application of the specialized technique for the creation of a Green Roof.

The goal of the REBUS (Renovation for Energy Efficient Buildings) project is to develop an Energy Renovation Path (ERP) to provide tools in the public sector for efficient public building renovation work, saving energy and resources.
