

Press Release - South East Regional Development Agency

"Conservation of heritage buildings through measures to reduce energy consumption"

The South East Regional Development Agency (ADR SE) implemented as a leader in the VIOLET Project - "Conservation of Heritage Buildings through Energy Saving Measures" funded under the INTERREG EUROPE Interregional Cooperation Program.

Priority 3 "Supporting the transition towards a low carbon economy in all sectors ", the specific objective 3.1" Improving the implementation of regional development policies and programs, in particular programs aimed at increasing investment and employment and, where appropriate, cooperation programs European territory that encourages low-carbon economy ".

The overall objective of the project is to improve the energy efficiency policies of buildings with a heritage value to conserve and adapt them to current energy efficiency standards.

The specific objectives of the project are:

- to promote the exchange of information between partner regions in the field of applying energy efficiency measures to heritage buildings by organizing participatory workshops and study visits
- developing and monitoring 5 action plans, transferring know-how and best practices at interregional level and including guidelines for improving regional policy
- encouraging the involvement of key actors through a multisector approach and setting up an advisory group of key stakeholders
- disseminating project results at regional, national, and European level, by developing project-specific communication tools
- making a recommendation to include standards for heritage buildings in European Union regulations

Tulcea Launching Conference 11-12 April 2017
