Regional partnerships: governance model

Connecting regional actors

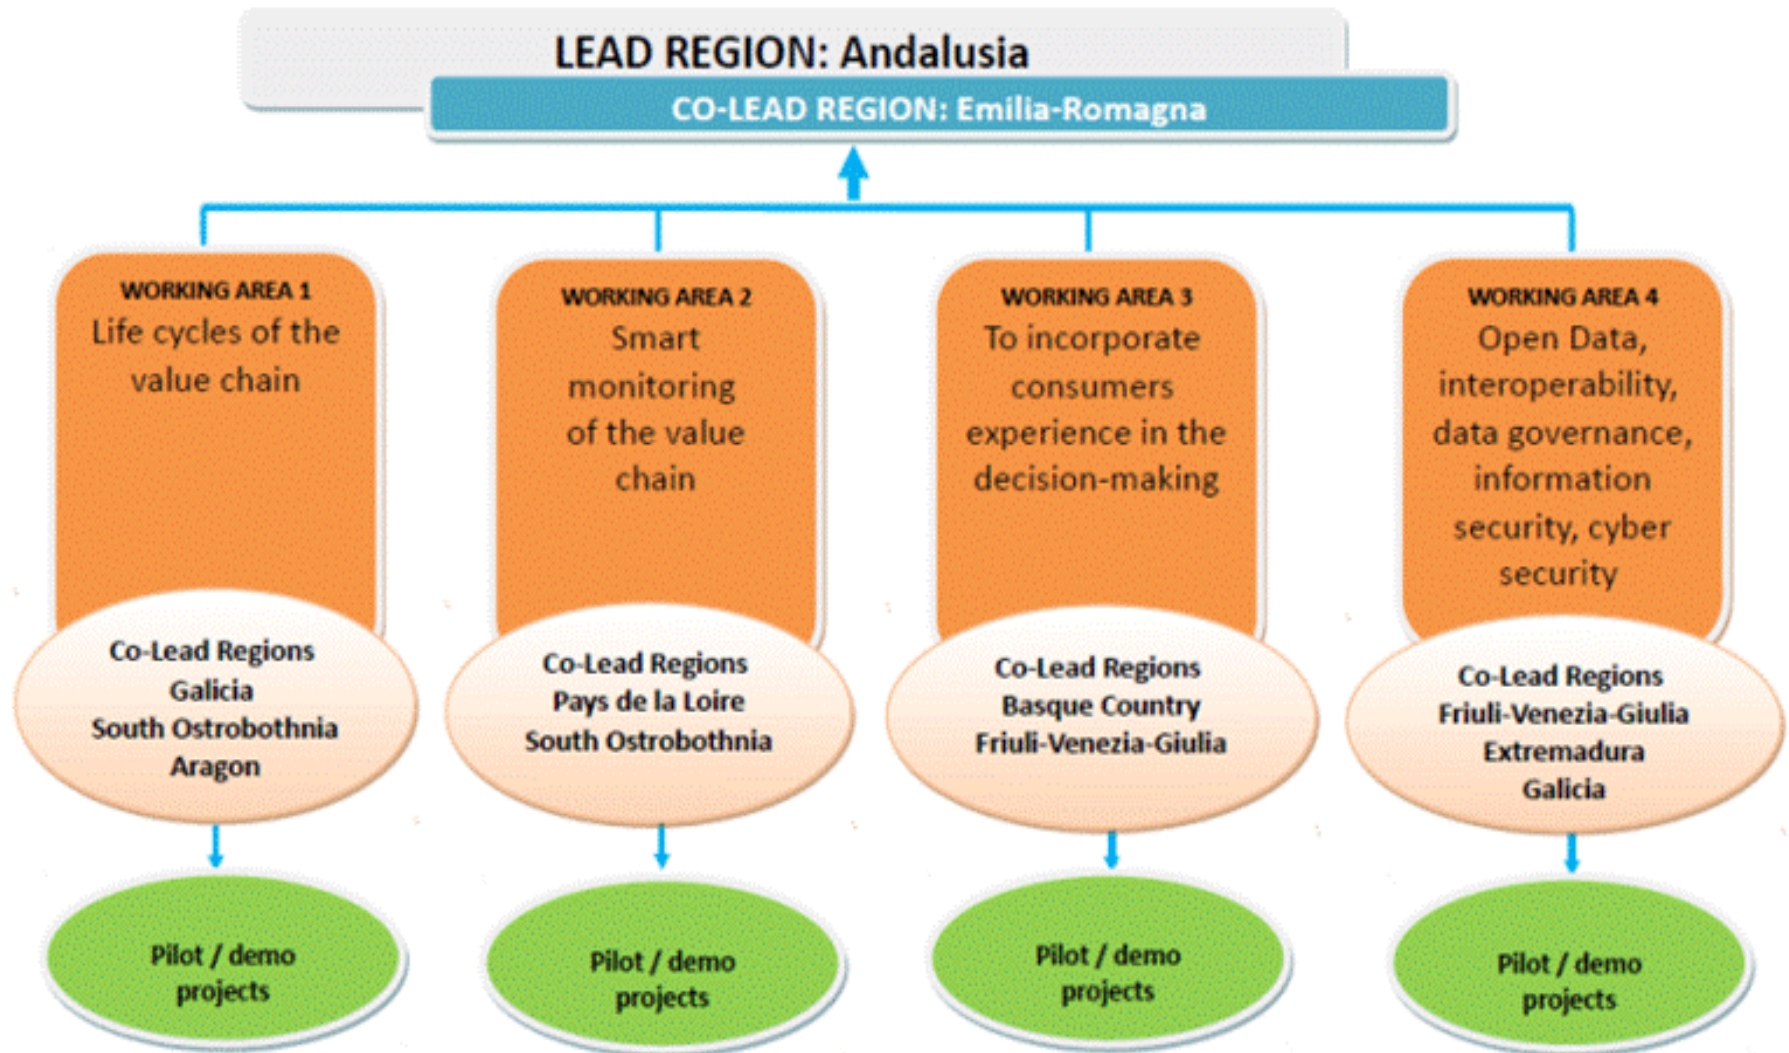

The Andalusian Regional Partnership as an example

94 Members

7 public authorities
20 research and
technology centres
44 ICT businesses
22 agro businesses
1 consumer association

- ✓ ITC and agro sectors have been connected
- ✓ Good practice identification
- ✓ A service charter is to be produced
- ✓ The agri-food sector challenge is to add value to data and use these data with new technologies

Who? The S3P Agri-food T&BD is more than a network of Regions

S3P Agri-food on T&BD: difficulties

- ✓ **Improving connections** between these partnerships and other European policies and building key collaborative links with different DGs of the EU Commission.
- ✓ Member regions agree on the need of having **specific financial support** for these partnerships and related-activities.
- ✓ Regions have **different priorities, speed, structure and competence** and also different **capacity to allocate funds**.

S3P Agri-food on T&BD main outputs and impact

- ✓ **Political commitment of 20 regions** and their hubs/nodes and commitment of **6 associate members**
- ✓ **Political priority for Lead and Co-Lead** regions at the highest level
- ✓ Involvement of **9 regions** in the Work Plan
- ✓ **Four working areas** identified
- ✓ **Interregional governance** adopted
- ✓ **Preparation of Work Plan** (to be approved in October 2017)
- ✓ At least a **project per working area** is expected next year
- ✓ Development of **work methodologies**

S3P Agri-food on T&BD: proposals for action

- ✓ **Specific funding** and redirecting and adapting European funds and programmes, such as Interreg and H2020
- ✓ **Coordination** structures and tools. European contact points with EU Commission
- ✓ **Online web platform** for networking
