

In depth description of the 5 good practices selected dealing with regulatory reliefs, incentives or other simplification measures

PARTNER *Sant'Anna School of Advanced Studies*

Good practice selected: Firms operating waste plants can provide auto-certification for authorization renewal

N. assigned in the mapping phase	[ID: 10]
Promoting institution(s)	State
Type of measure	Self declaration in the procedure of extension of a permission
Background	Firms operating waste plants need authorization for renewal permit or for renewal of inscription in the Register for waste management.
Detailed description of the measure	Firms operating waste plants can provide autocertification for authorization renewal or for renewal of inscription in the Register for waste management. The autocertification must be provided to competent authorities and is considered de facto a substitute for the authorization. It applies to EMAS, Ecolabel and ISO14001 companies that manage waste plants
Legislative reference	Legislative Decree 3 April 2006, n.152 Regulation on environmental topics art. 209 comma 1.
Level of Application (regional, national,	National

etc.)	
Score obtained in the first level assessment	10
Score obtained in the second level assessment	5,6
Final Score	15,6

Legal feasibility
