### **Strong interest of local actors, with the European project ZEROCO2 that participates in MAIX**

With the participation of many local stakeholders, on Tuesday 6/3/2018 in MAIX, the latest Local Government Meeting was held within the framework of the European project "Promotion of CO2 Emissions Buildings due to the use of energy in them / ZEROCO2 - INTERREG EUROPE, <http://www.interregeurope.eu/zeroco2>".

This project, which started in April 2016 and ends in March 2020, focuses on developing an Action Plan that will help improve and develop energy regional policies and is a cutting edge of European policy in recent years as it is directly related with environmental sustainability and climate change.

Project coordinator of the project is the Pontifical Energy Office of Slovenia, with the participation of, besides MAIX, the Molise Region of Italy, the University of Malta, the City of Kaunas in Lithuania, the Finnish Termopolitan Organization, the ABITEM Organization of France and the European Institute of Innovation in Germany.
