| | <p>a complement for Civic Amenity Sites' functioning– 'LAMUSOWNIA' and 'Selective Waste Collection Point BARYCZ'.</p> <p><u>Development and Timescale:</u></p> <p>In the Municipality of Krakow about 700 'Bring-in sites' are located. 'Bring-in sites' contains four igloo-type containers for a collection of selective waste fractions:</p> <ul style="list-style-type: none"> • paper/beverage cartons – blue container, • plastic and metal – yellow container, • white glass – white container, • colored glass – green container. <p>The frequency of collecting waste from 'Bring-in sites' depends of the waste accumulation in containers. Some of them are emptied daily.</p> <p><u>Factors involved:</u></p> <p>Municipal Service Company – the administrator of the waste management system in Krakow realises the handling. The company has got waste collection vehicles, which are customized to the waste collection from 'Bring-in sites'. Moreover, the Municipality of Krakow controls a proper execution of the service and bears the costs of it.</p> <p><u>Legal framework:</u></p> <p>The legal framework related to 'Bring-in sites' service are:</p> <ul style="list-style-type: none"> • the law on maintaining cleanliness and order in municipalities, • the Regulations of maintenance of the cleanliness and order in the Municipality of Krakow, • Directive 2008/98/EC on waste (Waste Framework Directive). <p><u>Financial framework:</u></p> <p>In 2016 the costs of the maintenance of 'Bring-in sites' were around 6 750 000 PLN (~1 600 000 EUR).</p> <p><u>Use degree:</u></p> <p>768 000 – inhabitants of the Municipality of Krakow (including 1536 inhabitants of the Heritage City Centre).</p> |
| 10. | Results |
| | <p><u>Proven results (through indicators) and success factors:</u></p> <p>In 2016 the percentage of selective waste collection from 'Bring-in sites' was 7 % of the selective waste total amount. The Municipal Service Company has a control staff, who heads the control of 'Bring-in sites' inventory, technical and sanitary condition and proposes their new location if it's needed. 'Bring-in sites' containers increase the availability of selective waste collection services for inhabitants.</p> |

|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <p><u>Main difficulties encountered:</u></p> <p>There are cases of throwing waste to wrong containers. Some inhabitants are uneducated in selective waste collection in 'Bring-in sites' – they contaminate the selective fractions by throwing wrong waste to the bin (e.g. glass cullet or porcelain to the glass container). There are also occasionally 'Bring-in sites' acts of vandalism, which are recorded by the Municipality of Krakow. Inhabitants sometimes put waste around the container, which can cause difficulties in their collection.</p> | |
| 11. | Main lessons learnt from the practice | 'Bring-in sites' are a complement for Civic Amenity Sites' functioning. They enable a collection of selective waste fractions like paper, plastic, metal and glass. 'Bring-in sites' containers increase the availability of selective waste collection services for inhabitants. They contribute to the increase of the 'selective waste fractions (paper, metal, plastic, glass) recycling and preparation for reuse' rate. |
