endesa

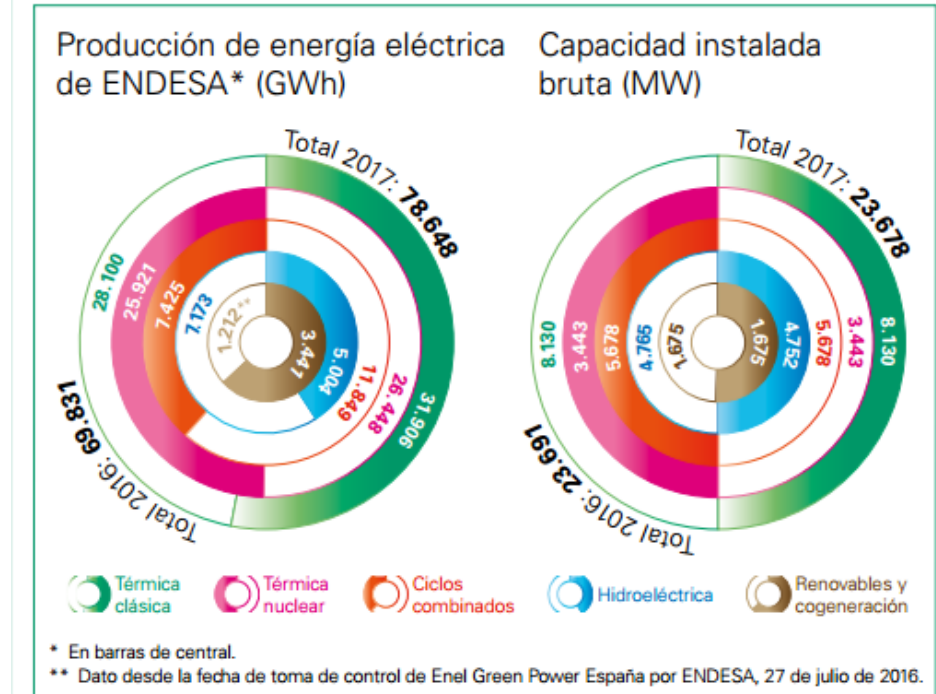

Brief description of Endesa

Endesa is a leading Company at the energy sector in Spain and Portugal.

ENDESA's activity is structured by business lines, working primarily through the following companies:

- “Endesa Generación” for power generation
- “Endesa Renovables” for renewable energy
- “Endesa Red” for power distribution
- “Endesa Energía” for marketing of energy

EMAS within Endesa

Quick review and history

ENDESA achieved the objective of reaching 100% of its generation and distribution facilities certified for International Standard ISO 14001.

The publication of Environmental statements EMAS by ENDESA started in 2007 and it has continued on a yearly basis since then. However, it remains within thermal power plants (27) and their associated ports (3).

Certification of the environmental management system according to standard ISO 14001	
 100% of fossil fuel generation	 100% of hydroelectric and renewable generation
 100% of the active mining activity	 100% of the port terminals
 100% of the electricity distribution activity	 16 corporate offices and office buildings

78.3% of the installed net power or capacity of all ENDESA thermal power plants is produced in plants registered with the European EcoManagement and Audit Scheme.

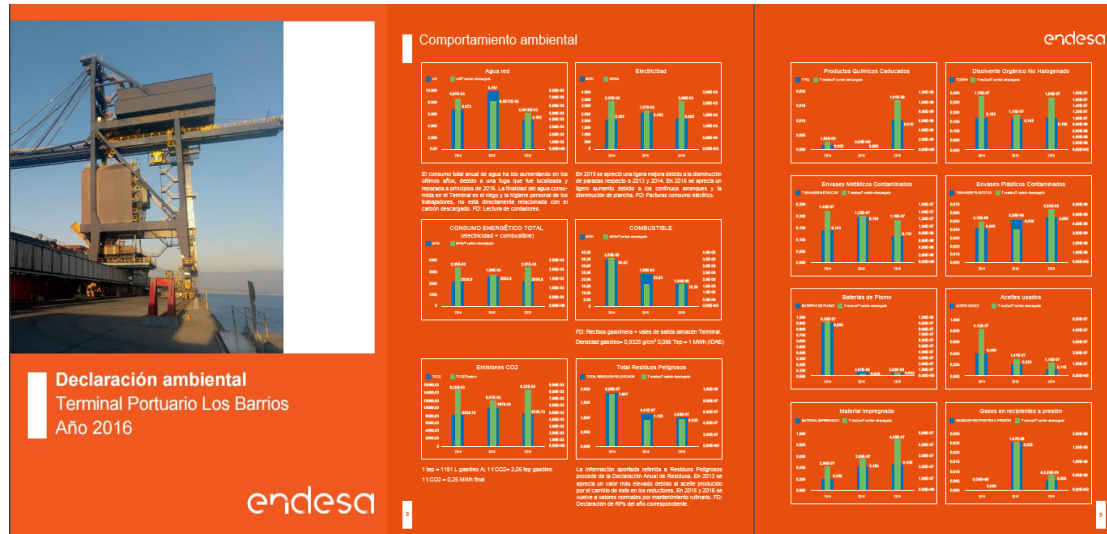

100% of the port terminals are registered in EMAS.

Challenge: Stepping up from ISO14001 to EMAS

Environmental statement communication

Case study: Port at “Los Barrios” (Andalusia)

Scope: the activities of “mooring, loading and unloading of ships, handling and shipment, of solid bulk”

Environmental statement “Los Barrios” 2016

What may help...

...more ISO-certified organisations (within Endesa) to step up to EMAS?

Current scenario (Spain)		Proposal
EMAS & regions	Environmental statement per site/region	Mutual recognition between regions (multisite organisations)
Public Procurement (National)	Companies under carbon footprint registration	EMAS consideration within Spanish national government Green public procurement criteria
Communication of incentives	Legal framework mainly	Sectoral Communications even per Organisation
Sectoral Reference Documents (SRD)	Priority sectors (retail, tourism, construction, etc)	Energy as a priority sector

Performance,
Credibility,
Transparency

Thank you
