“Policies for Cultural Creative Industries: the Hub for Innovative Regional Development”

Workshop with stakeholders/Slovenia

Date: 16th March 2018

Location: City Hall, Mestni trg 1, 1000 Ljubljana, Slovenia

Time: Friday from 9:30 till 13:30

The event was dedicated to the co-creation of measures for the action plan to improve the development of Cultural and Creative Industries (CCI). Based on the second and third objectives of the Roadmap document and presented best practices, stakeholders developed the set of measures for empowering and contributing to the development of the CCI's. Through different activities and continuous process of cooperation, RRA LUR aims to provide key decision-makers and policy-makers working in this field with concrete proposals to improve the status of CCI's. The cooperation with Center for Creativity (CzK) brings the added value to the project and to the involved stakeholders. Through its participation CzK strives to test existing program measures for key target groups, while also gaining direct insight into sector proposals on possible improvements of their performance.

The proposals designed on the workshop present important guidelines for the development of the action plan.
