

“Regional Policies towards Greening the Social Housing Sector”

4th NEWSLETTER

Social Green is an EU funded project working in eight municipalities and regions in six EU countries.

Together, we are developing solutions and policies on how to make social housing sector more green through mutual learning and development of improved regional policies.

This provides the opportunity to explore green building practices and significantly reduce GHG emissions through cost-effective means while providing much-needed housing in a healthy and sustainable manner.

SOCIAL GREEN SELF-EVALUATION REPORT

In which state is the social housing in the regions where Social Green is being developed?

According to the new results of the integrated self-assessment of Social Green, there is **great potential for better coordination of policies and financing to improve energy efficiency and social housing in Europe**. This especially includes ways in which European funds can be integrated with other funding sources in order to promote the adaptation of social housing.
