REGIO-MOB
Sustainable Urban Mobility for Region and City

The project focuses on the development of sustainable urban mobility solutions for regions and cities. It aims to improve the accessibility, connectivity, and sustainability of public transport systems. Key activities include the implementation of innovative mobility services, the promotion of multimodal planning, and the enhancement of public awareness about sustainable transportation practices.

Key Partners:
- European Commission
- Regional governments
- Local authorities
- Academia
- Private sector

Objectives:
- Develop integrated mobility solutions
- Increase public transport usage
- Reduce carbon emissions
- Enhance social inclusion

Expected Outcomes:
- Improved urban mobility systems
- Enhanced livability and quality of life
- Increased economic competitiveness

Implementation:
- Pilot projects in selected regions
- Knowledge transfer and capacity building
- Policy development and dissemination

Supporting Organizations:
- European Network of Green Urban Mobility
- International Transport Forum
- World Bank
