

PROGRAMME

Study visit 5

Lille

27 – 29 may 2019

CONTEXT

5th and closing study visit organised within the MOLOC project by the lead partner City of Lille.

OBJECTIVES

- Present best practices in Lille to project partners (municipal projects as well as projects led by stakeholders) on the low carbon topic (realised or on-going projects). Specifically focusing on 3 priorities :
 - Energy retrofitting of private and public buildings
 - Low carbon urban projects
 - Adaptation to climate change initiatives
- Explain MOLOC partners' contexts and challenges to the French stakeholders, present their best practices
- Support match making with Lille stakeholders
- Use the opportunity of the study visit to organise a steering group meeting
- Use the opportunity of the study visit to communicate to professionals about the project
-

YOUTH PROJECT

The City of Lille works in partnership with the « Interphaz » association (<http://www.interphaz.org/>). The association runs a Youth Popular University. On Monday May 27th we will welcome some young people from Lille to give them an overview on the low carbon city issue. We will also welcome members from the **Lille Youth Council**.
