

*Regional conference of communication and dissemination result of*

## **SUPPORT**

Support to local governments for reducing carbon emissions

### **LIMIT THE ENVIRONMENTAL IMPACT OF PUBLIC BUILDINGS: WHERE ARE WE?**

**25 giugno 2019 - Villa Altieri | ore 9.30 – 13.30**  
**Viale Manzoni, 47 - 00185- Rome - Conference Room, first floor**

Villa Altieri  
Palazzo della Cultura e  
della Memoria Storica

The construction sector is rapidly transforming itself based on the growing demand for energy and environmental quality.

A real cultural and technological revolution that is leading to radical changes in all phases of the building process, from design to construction techniques, from the use of materials to energy and plant technology.

One of the main aspects of this path is that of the new energy identity of the building and the possibility of making it energy producer, of which it itself needs, through the use of renewable energy sources and the efficiency of the envelope and plants .  
But the main challenge of energy efficiency is played in the public construction sector, a sector in which the most rigorous legislation and the understandable need for visibility require a particularly virtuous approach.

For these reasons the role of communication and dissemination of the results of three years of activity of the SUPPORT project, the purpose of this Conference, assumes a substantial and strategic importance for the future of regional programming.

### **PROGRAM**

9.30 am - Registration of participants

10.00 am - Introduction to the work

10.15 am - The Interreg Europe 'SUPPORT' project

- Arch. Patrizia Giancotti (Metropolitan City of Rome Capital) - The experience of the SUPPORT project, dissemination, state of the art and perspectives.

- Dr. Karl-Ludwig Schibel (Alliance for Climate Italy) - The Interreg Med 'ENERJ' project, Joint actions for energy efficiency.
- Maurizio Zara, (Alliance for Climate Italy) - From PAES to PAESC, first lessons learned.

11.00 am - MODELS OF INNOVATION

**Moderated by Mauro Spagnolo (director Rinnovabili.it)**

- Dott. Flavio Monosilio (ANCE) - Energetically efficient buildings: a tool against degradation.
- Prof. Luca Rubini (ATI National Secretary General) - Prospects and innovative solutions for energy efficiency in the building sector.
- Ing. Francesco Belcastro (FIRE Italian Federation for the Rational use of Energy) - The role of the energy manager in the Public Administration.
- Arch. Enzo Pinci (A.D.S.I Association of Italian historical residences) - Energy issues in Historic Houses.
- Arch. Tiziana Gallo (Consultant MISE - Creator and technical coordinator of the "INTELLIGENT BUILDINGS" program for Fano) - Intelligent buildings program. Urban regeneration plan for zero consumption of land, addressed to the p.a. for the reduction of co2.

1.00 pm - Space for questions and conclusions

1.30 pm - Light Lunch
