

Policy Brief for Lazio

KEY ACTION OF THE PROMETEUS REGIONAL ACTION PLAN

- *GUIDELINES FOR THE REGIONAL PLAN FOR ELECTRIC MOBILITY*

Update, refinement and implementation of the Guidelines for the Regional Plan for Electric Mobility, most notably in the updating of the analysis state of the art, the calculation of the charging needs and the definition of a financial plan.

The Guidelines will be completed by two documents:

- ✓ Guidelines on administrative procedures for charging points realization (both in private and public areas)
- ✓ Guidelines for the design of charging sites and stalls for electric vehicles

KEY MESSAGES FOR POLICY MAKERS

- 1) Promote the creation and strengthening of an extensive network of recharging points **BEFORE** encouraging the purchase of electric vehicles
- 2) Concentrate regional resources to promote the creation and strengthening of an extensive network of recharging points in small cities and rural areas as big cities have their own resources and E-Mobility Plans
- 3) Develop effective communication campaigns to inform citizens about the location of recharging stations
- 4) Without actions 1)-2)-3) it is not possible to obtain any behavioral and cultural change by the citizens
