Benchmarking study
Identifying good practices for innovation policy mixes evaluation
General overview of MANUMIX’s results

10 good practices reported:
4 about evaluation & monitoring and 6 about instruments
Results (I)

Changes related to evaluation

• Improvement of the S3 monitoring and evaluation system of Piedmont’s Smart Specialisation Strategy (RIS3).

• Improvement of the evaluation and monitoring system of the Basque RIS3 (Science, Technology & Innovation Plan).

• Expected improvement of the Basque soft loan programme to support industrial investments to introduce innovations in SMEs (Gauzatu Industria).
General overview of MANUMIX’s results

Results (II)

Changes related to the policy mix, including new practices and instruments

• Development of an Industry 4.0 diagnostic and benchmarking to deploy new instruments in Industry 4.0.

• Modification of the financial conditions of the main Advanced Manufacturing subsidy programmes of Lithuania to increase applications and funded projects.

• Expected improvement of the main business R&D subsidy programme in Basque Country (Hazitek) to better support strategic projects.
