

#eBussed

eBussed supports regions in the transition towards low-carbon mobility and more efficient public transport in Europe by promoting the use of e-buses.

eBussed on the way towards low-carbon mobility

During the spring, the eBussed project has been busy in gathering and sharing information. The first produced articles can be read in this newsletters, and more will follow.

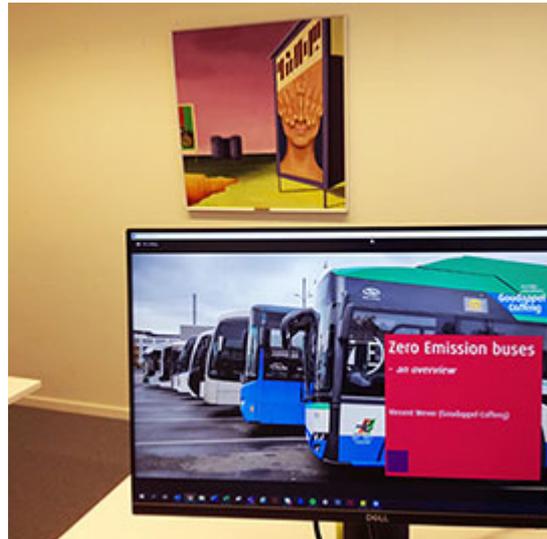

Due to the exceptional times, the planned events have been changed to webinars, allowing anyone interested, to participate. The next webinar is in sight in September. More details can be found later in this newsletter. Enjoy the ride!

From zero-emission to charging method comparison

The series of eBussed in-depth expert webinars started with the theme Electric Bus Tech. The two speakers Vincent Wever from The Netherlands and Marko

Paakkinen from Finland gave the participants an interesting ride on the rapidly changing world of e-bus technology.
