Dear partners, dear stakeholders, dear readers,

2020 is over, and we look back to last year with mixed feelings: fear and dismay, but also hope and resilience.

We all have had to adapt to a new reality, and POTEnT consortium also adapted to the new situation: we replaced our meetings with online discussions, took part in online conferences and events but most importantly we kept the momentum and delivered many important activities for maintaining the interregional learning active.

In this third newsletter you can read more about the project: our last project meeting held on the 11th of December and how the interregional learning have changed to meet the new conditions, but also 2 very interesting and promising contributions from our partners ALOEN and the city of Pamplona. As we want to get to know more our partners, this time we went far north to understand how the Energy Agency for Southeast Sweden and Tartu Regional Energy Agency are facing energy transition in their regions and what are their objectives within POTEnT project.

Keep following our website and social channels to read what is happening in POTEnT project and in our partner regions. For now, enjoy your reading, we'll be back soon with more news!

We wish all of you and your loved ones a safe & healthy 2021!

News

What about POTEnT Interregional learning process?

Unfortunately, in this end of 2020 and also for the beginning of 2021 Covid-19 is still having a strong influence on everyone's life in Europe and, accordingly, also on POTEnT.

A study trip, just in time!

Just before the new shut down/confinement in France (end of October), a delegation from Lorient, stakeholders in the POTEnT project, was able to go and study many good practices in terms of energy reappropriation in the Rhône-Alpes Region (East of France).

Pamplona Municipal Police becomes a “prosumer”

As part of the Horizon 2020 European project called Stardust, the City of Pamplona installed a photovoltaic solar panel roof on the local police building.

Events

POTeNT partners meet online

During the latest POTeNT meeting, held on Friday 11 December, partners discussed about the updates on next semester activities. The new project design shows a remarkable flexibility entailing the exploration of new ways for project development, such as online visits.

Focus

Let's go far north to get to know better ESS and TREA

Two energy agencies of POTeNT partnership answered our questions.

ESS is the Energy Agency for Southeast Sweden.

Read the interview [here](#)!

TREA is Tartu Regional Energy Agency.
