# Action

**Development, adoption and approval of a new General Plan for the growth of the Port of Varna, with the lessons learned from the Smooth ports project interpreted and used in the implementation of the project.**

# General Plan for the Development of Port Varna

**State Enterprise "Port Infrastructure" (concerned party in the project "Smooth ports") is the contracting authority for a project for development and approval of a master plan for a public transport port of national importance Varna, the related preliminary / pre-investment / development studies and the terms of reference for design. The General Plan is being developed for the following port terminals:**

- **Varna-East Port Terminal for handling general, dry and liquid bulk, Ro-ro cargo and containers, as well as for passenger service;**
- **Varna-West Port Terminal for handling general, dry and liquid bulk, Ro-ro cargo and containers;**

- **Port terminal TPP-Ezerovo for processing of dry bulk cargo (coal);**
- **Port terminal "Petrol Varna" for handling liquid bulk cargo;**
- **Port terminal Ferry complex-Varna for processing of railway wagons and automobiles transported by ferry ships;**
- **Lesport Port Terminal for handling general, dry bulk and Ro-ro cargo, vegetable food liquid bulk cargo and empty 20-foot containers from / on a stack;**
- **Balchik Port Terminal for processing general, bulk, vegetable liquid bulk cargo and mail.**

# Stages for Realising the Project

**The project is divided into 5 separate stages with one sub-stage as follows:**

- **Stage 1 - Carrying out a pre-investment study, according to Ordinance № 10 of 31.03.2014 on the scope and content of the General Plans of the ports for public transport.**
- **Stage 2 - Preparation of variants for preliminary conceptual solutions for a draft of a General Plan for development with feasibility study and SWOT analysis of the variants.**
- **Stage 3 - Preparation of terms of reference for a draft of a Master Plan for the Port of Varna**

- **Stage 4 – Development of a draft for a Master Plan for the development of the port of Varna.**
- **Stage 5 – Coordination, approval and application of the Master Plan.**

**Varna Regional Administration and State Enterprise "Port Infrastructure" have set themselves the ambitious task that the General Development Plan of Varna Port will be approved and entered into force before the finalization of the project "Smooth ports". The choice of contractor for the realization of the project has already been made, and work on its realization is expected to begin soon.**
