## REPORT OF THE DISCUSSION

The workshop was organized together with the Senate Chancellery of Hamburg (associated partner in REPLACE) and their EU project CIRCuIT.

The discussion first focused on the draft of the local analysis from the REPLACE project to receive feedback and additional information to be included. Afterwards, the discussion was opened to the broader topic of CE in Hamburg in general and how to further develop the topic. Apart from gaps, potential solutions have been discussed. For the broader part of the discussion, we used the online tool miro.

**For ENGAGEMENT:** Virtual workshop with a group; for the discussion the tool miro has been used

## CONCLUSIONS

We received helpful feedback on the local analysis and how to further improve the document before publication. Moreover, the discussion about CE in Hamburg helped to identify gaps and potential solutions how to overcome them which not only helps the REPLACE project.
