

how to stimulate pro-environmental innovation? how to choose/stimulate technologies which are not available on the market?

Sustainable and innovative PP promotes SDG goals!

Interinstitutional cooperation: national level (coherence of public spending long-term objectives)

Life Cycle Impact Assessment fosters visions of sustainability

Interinstitutional cooperation: LRAs funding and research agencies

Are smart specialization strategy interconnected with GPP policies?

multi-criteria metrics/methods are hard to apply, but they are needed to avoid spillover effects!!

standardized metrics for application and selection of criteria help replicability of good practices

Who/how to measure replicability of good practices? Metrics and communication!

needs assessment and market dialogue to tackle lack of know how and fear of risks and mistakes for SMEs

Focus/support of planning stage, market dialogue and market informatin

Life Cycle Thinking and assessment to be integrated in the policy cycle

"Planning" and "Contract and supplier development". Very important

EU GPP policies to ensure uptake of innovative, green and social PP

LC thinking highly integrated in EU GPP policies, but also LCC and LCA are backed up!

extent to which it can usefully be replicated in my region

relevance to my learning
