

URBAN LINKS 2 LANDSCAPE: Umbria Region and the external experts during their first inspection of the cycleway Terni-Narni (action 1 of our AP) - July 30th2020

As per the ACTION 1 of the Umbria Region Action Plan for the ROP 2014-2020 project - Terni Narni cycle path of the Nera River- at the preliminary stage, it was essential to develop a regional accompanying process to supports the Local Authorities and designers in refining the projects in the direction of better integration with the landscape, in the use of green material, in the integration with the pre-existences, but also in the participation processes, and in defining possible integrations with other future actions, in a multidisciplinary and environmental sustainability perspective.

On **30th July 2020** the external working group of the Umbria Region organized a first inspection of the cycleway Terni-Narni together with the technicians of the Municipality of Narni and Terni, to identify the best design solutions to achieve the actions set out in the Action Plan.

After the inspection and an in-depth study of the project the external working group of the Umbria Region suggested some alternative hypotheses sending a report to the Municipality of Narni that examined in detail the route, the constituent elements of the project, the elements of architectural detail, the interventions of landscape character.

Following some photos part of the photographic report of the route, made to better focus on the design issues and possible improvements:
