

# FINAL NEWSLETTER

**WaVE** focuses on the improvement of regional and local policies to open up their possibilities to support the development of integrated adaptive reuse of water-linked cultural heritage sites in human settlements

## ACTION PLANS

### Action plans: the word from partners

We interviewed the partners on the progress of Action Plans.

#### BREDA

They have elaborated the issue of water and water related heritage on different levels: on a strategic level and on a tactical level, and on an operational level.

[Read the interview](#)

#### ISTER-GRANUM

By 2030 the water-related heritage sites of the Ister-Granum EGTC will become tools for recuperating people's relationship with water...

[Read the interview](#)

#### ALICANTE

During these past months they have been following the roadmap of the Action Plan by preparing a submission for a National Call funded by NextGenerationEU, for a project to establish a 'Green Corridor' in the River Monnegre from the dam of Tibi to the river mouth in the municipality of El Campello.

[Read the interview](#)

#### RAVENNA

Since the end of phase I extension they have been working on finalizing the project ideas with the local stakeholders so as to be ready for the project submission upon opening of the ERDF ROP calls. The three actions are now ready with only minor adjustments required.

[Read the interview](#)

#### AARHUS

In Aarhus they have focused on the writing of historical area descriptions of the three appointed areas from the WaVE project

## ISTER-GRANUM PROGRESS OF ACTION PLANS ACTION RESULTS

**What have you been working on in recent months?**

*Ister-Granum's Pilot Action is dedicated to test - in selected settlements of the region - heritage valorization actions which includes the implementation of a research identifying tangible and intangible water-related heritages with a special focus on traditional water-related occupations and legends; and create thematic routes along these heritages applying storytelling.*
