SET-UP

Smart Energy Transition to Upgrade regional Performance

Federico Sgarbi | European project manager @ BDI
f.sgarbi@bdi.fr

Europe, let's cooperate! 22 March 2016

What challenge are we facing?

- Improve the energy performance of partner regions thanks to improved smart grid policies
 - Managing growth in electricity consumption
 - Optimizing distribution
 - Coping with sustainable...
 - ...and decentralized energy generation

Why will cooperation help?

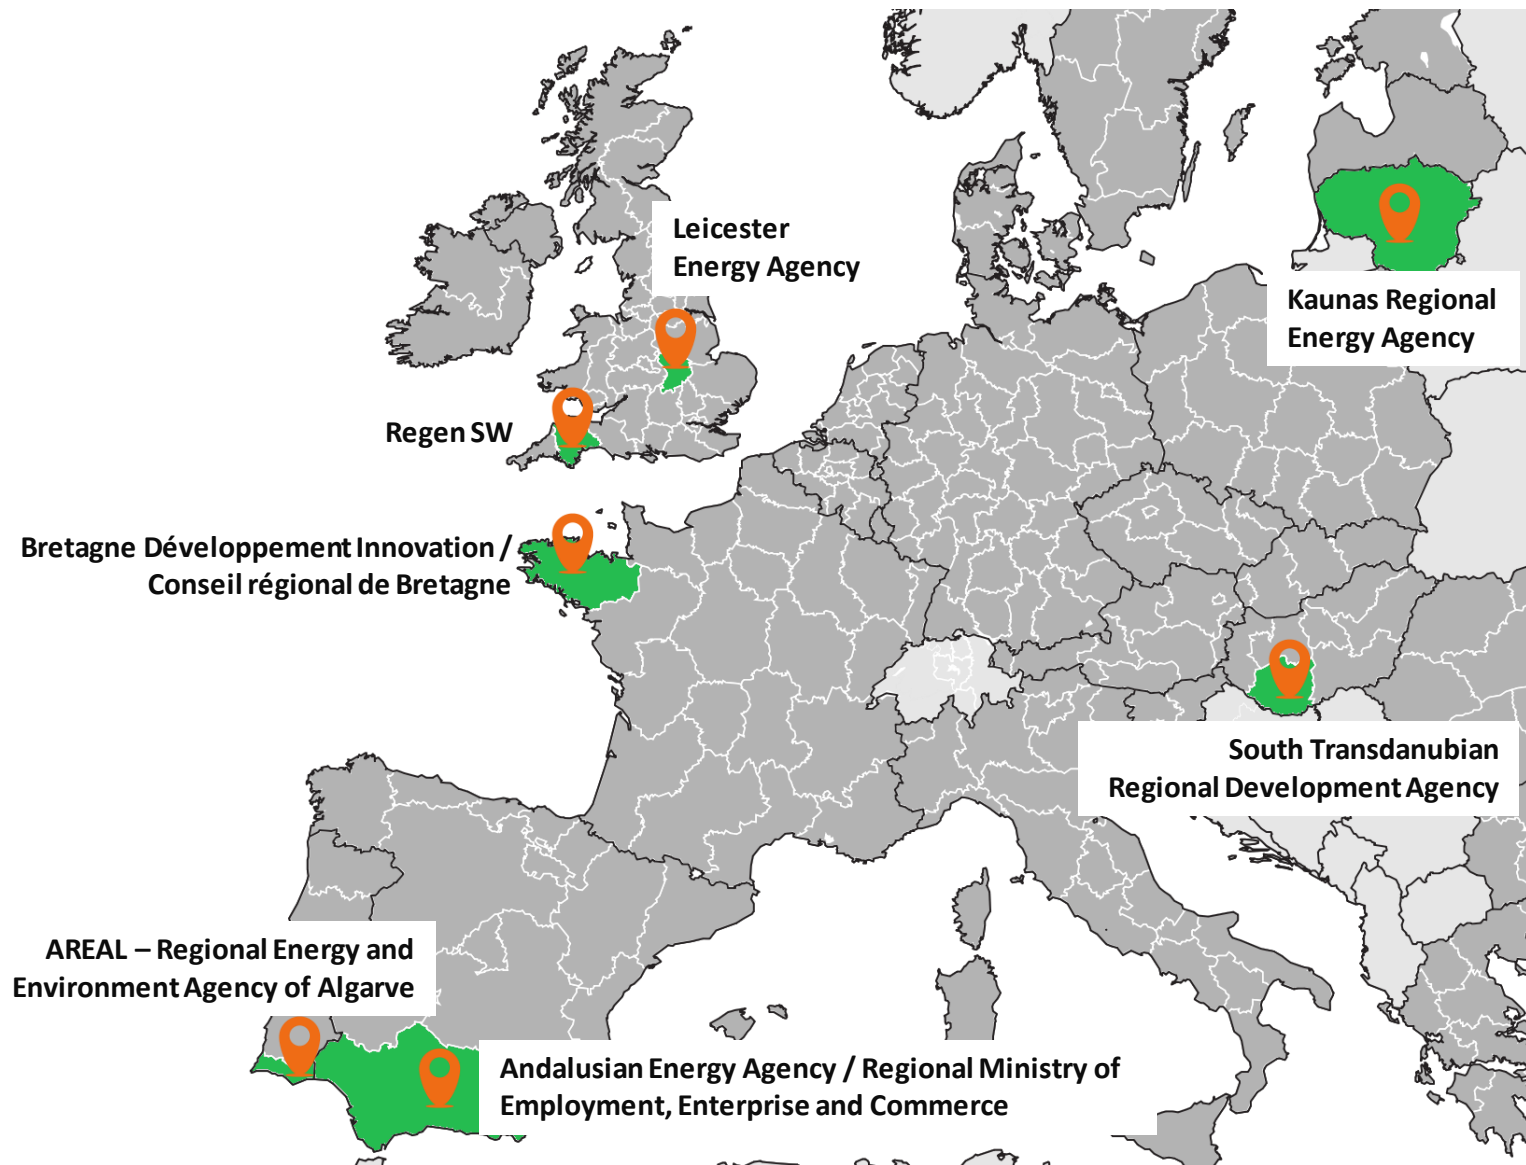

- Smart grids are a relatively new topic
- Real need to exchange on the role that regions have in the development of Smart grids
- And on the tools to be developed/employed
- 3 levels of mutual learning: individual, organizational and stakeholders

What will our project do?

- Three sub-themes :
 1. Empowering consumers and acceptability
 2. Economic models
 3. Funding sources
- Creation of Local Energy Transition Supporters (LETS) stakeholders groups
- And interregional Energy Team (ET)
- Synergies with other regional strategies and projects
i.e. Brittany's SMILE project

Who else is involved?

What impact do we expect?

- Policy improvements in the ERDF POR (energy efficiency/energy transition)
 - Implementation of new projects
 - Change in the management of the policy instrument
- Increased understanding and practical application of smart grids
 - Better energy management
 - New opportunities for local companies working in the energy sector
