

## Why do we believe that CHIME is a good INTERREG proposal?

The proposed CHIME project aligns closely with the goals and focus of INTERREG, specifically in improving the implementation of regional development policies and promoting the exchange of experiences, innovative approaches, and capacity building.

1. **Exchange of Experiences and Innovative Approaches:** The CHIME project promotes the exchange of experiences among participating cities in managing Modern Heritage assets. Through workshops, site visits, and knowledge-sharing events, regional policy actors will have the opportunity to learn from each other's experiences, challenges, and solutions. This exchange of experiences will enable the identification and dissemination of good practices in Modern Heritage maintenance, contributing to the improvement of regional development policies.
2. **Capacity Building:** The CHIME project places a strong emphasis on capacity building. Participating cities will enhance their knowledge and understanding of successful practices in Modern Heritage maintenance through training sessions, conferences, and publications. The development of the European City Heritage Information Model (CHIM) will equip regional policy actors with the necessary tools and resources to effectively manage and preserve Modern Heritage assets. By building the capacity of participating cities, the project contributes to the overall improvement of regional policy implementation.
3. **Networking and Transfer of Good Practices:** The CHIME project aims to establish a CHIME project network, allowing participating cities to network, exchange experiences, and transfer good practices in Modern Heritage maintenance. The development of a replicable model and template ensures that the knowledge and best practices shared within the network can be adopted and repeated in other cities across Europe. By finding solutions to shared challenges through networking and the transfer of good practices, the project contributes to the overall improvement of regional development policies.

CHIME aligns with INTERREG's goals and focus by facilitating the exchange of experiences, innovative approaches, and capacity building among regional policy actors. It addresses the core focus of Interreg Europe on capacity building, ensuring that participating cities enhance their knowledge, skills, and resources in the management and preservation of Modern Heritage assets. Through networking, exchanging experiences, and transferring good practices, the project contributes to the shared goal of finding solutions to challenges faced in the sustainable maintenance of Modern Heritage, ultimately improving the implementation of regional development policies.
