Building with no waste

Concrete with 100% recycled aggregates

Annica Flade

CEO, Recycon A/S

af@recycon.dk

14-15 NOVEMBER 2023 | NAVARRA

No waste!

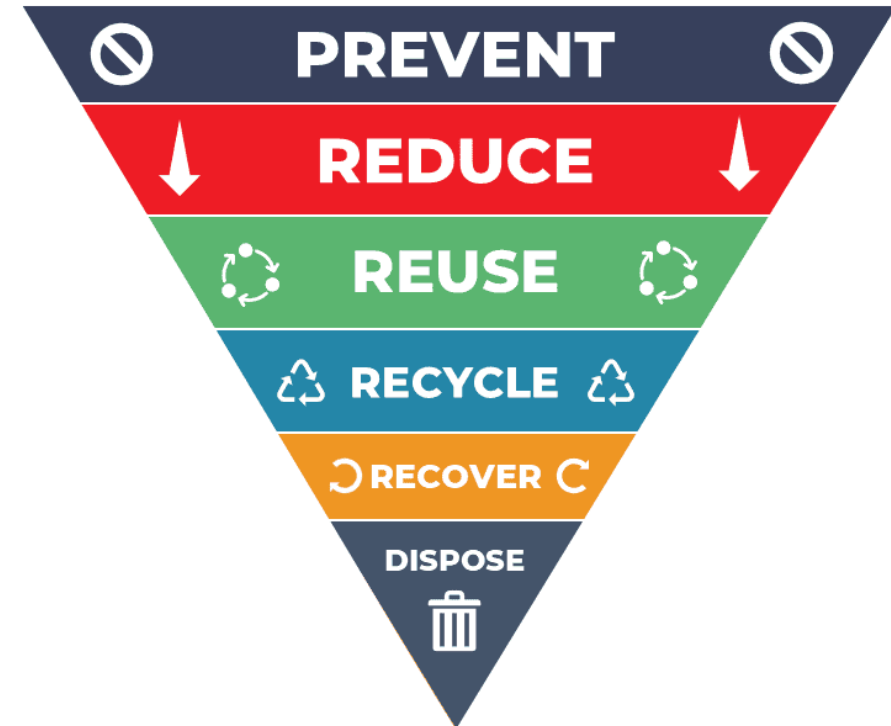

Processing of recycled waste fractions

- Selective disassembly (where possible)
- Waste recycling sites
- Waste processing
- Concrete element production

Influence on the environment

- 4.3 million tons of waste - **ONLY construction waste!**
- Lack of virgin raw materials
- Reusing building materials
- Circular economy

Project circular economy

- **Public recycling centers, Region Zealand (AffaldPlus)**
- **Sorting asbestos-free roofing sheets**
- **Stone, gravel and concrete**
- **New concrete elements and decks**

*“Break old habits – have focus on waste management and circular economy. Start building with as much recycled materials as possible – because it **is** possible!”*
