Sustainable mobility in Paris

Connect mobility and habitat

Guillaume Privat

Study officer at Paris Climate Agency

guillaume.privat@apc-paris.com

24 October 2023 | 15 Minutes | Rzeszow

Background in Paris

- **CO₂ emissions in Paris in 2019**

- Building accounts for 77% of CO₂ emissions
 - 42% for residential sector
 - 35% for tertiary sector
- Road transport accounts for 20% of CO₂ emissions

- **Objective of the City of Paris climate plan for transport**

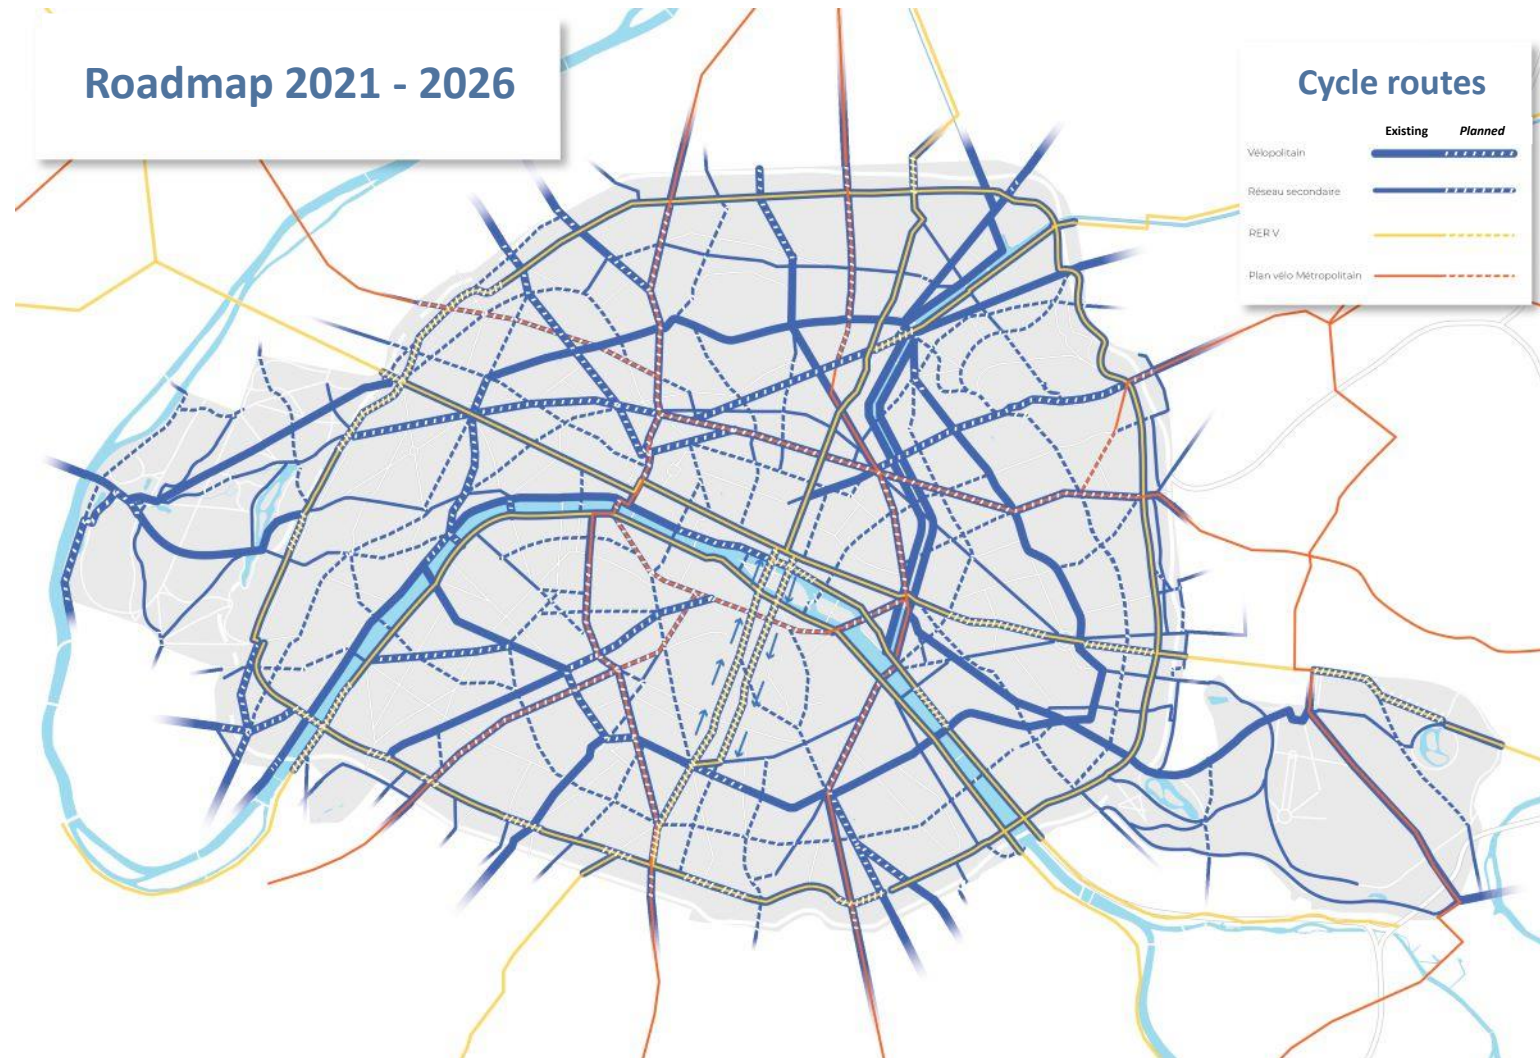

- Target of zero petrol-powered vehicles in Paris by 2030
- An exemplary fleet: replace 1,200 light petrol-powered vehicles – i.e. 90% of the fleet of the city – with clean vehicles (NGV, electric, hydrogen-powered, etc.)
- The City of Paris will draft a hydrogen development strategy

City of Paris' Cycling plan

- From 2021 to 2026
- Aiming to become a 100% cycle-friendly city
- 180 km of new safe cycle routes
- Create more than 130,000 new cycle parking spaces
 - Including 50,000 new places in the private sector (condominium, social housing, businesses, etc.).

City of Paris' Cycling plan

Cycle parking spaces in condominiums

- The key to transform car parks in condominiums and encourage people to use bicycles instead of cars
- National aid exists to help condominiums install bicycle parking spaces.
 - called "Alvéole +"
- Redirects co-owners supported by CoachCopro to the "Alevéole +" scheme

Promoting creation of recharging infrastructure for electric vehicles

- **True issues to recharge electric vehicles in condominium**
 - A dedicated infrastructure must be created
 - Decision-making by owners
- **A study has been drawn up to identify the potential in condominiums and help the city to act more easily to support condominium owners**
- **Providing first-level information via CoachCopro platform**

**Time for
questions**
