

## OSDD Catalonia 28–29 November 2023

After: interview with the host organisation ACCIÓ

- How did the OSDD go?

All in all, we believe the outcome of the OSDD was truly positive. All guests and participants were satisfied with the seminar and the subsequent visits to the BSC supercomputing centre and the GCR company. The feedback we received from them was positive, and we believe that the exchange of experiences, best practices and public policies around the plastics sector was good, as was the subsequent networking between the different invited and local stakeholders.

- Were there any unexpected surprises during the OSDD? Positive or negative.

Overall, there were no unexpected surprises or unforeseen events beyond some minor logistical or technical issues during the seminar, which were easily solved and did not impede the smooth running of the event.

- What did you, your region and/or your companies get from the OSDD?

Local companies and stakeholders took note of the different initiatives and policies presented by partners from each region, as well as networking with potential partners, and in general the event was useful for them to learn about cutting-edge projects on the reuse, recyclability and circularity of plastics, as well as to explore ways of collaboration with some visiting stakeholders.

- The word is yours 😊

We would like to thank all partners and stakeholders who have participated in the OSDD, without them the OSDD could not have been realised. This event has been successful thanks to them, to their involvement and interest shown at all stages. The exchange of experiences and contacts during the seminar and the visits has allowed us to establish contacts with the potential to become future collaborations between the different participating stakeholders. The behaviour, treatment, interest and attitude of the participants was exemplary.
