

*“Numantec Group – many companies under a single brand”*

“Our mission is to find functional, safe and quality solutions for healthcare personnel and patients, in order to minimize human error and guarantee optimal care performance. The combination of different companies, united by ideals and growth drives, has allowed the creation of a strong, and at the same time dynamic, Group, capable of entering the compact and cohesive European and global panorama. The complementarity of the product portfolio available and the know-how of the individuals allow the group to continue to grow to become the reference company for the biomedical sector on a global level” Gabriele Giovanelli, CEO of the Group, tells us.

“With the active aging of the population and the increase in oncological diseases, it will be increasingly necessary to focus attention on the patients, their well-being and pain treatment, using increasingly cutting-edge products, both from the point of view of materials, and of comfort and design, thus improving the life of the persons in their daily lives”.

**NUMANTEC** is the biomedical group made up of different companies specialized in healthcare solutions, that places patients’ well-being at the center of the constant search for innovative and technological strategies able to improve people's quality of life by minimizing risks and complications during treatments.

**Delta Med**, a leading company in the vascular access sector, specializes in the production of traditional, safety, closed system catheters, long, midline and picc catheters, with constant attention to the patients, which guarantees the comfort necessary for the protection of the most vulnerable patients.

**Pentaferte**, active in the production of infusion syringes with and without needle, of different sizes and calibers to best adapt to the veins of the most fragile; they also produce a vast range of syringes pre-filled with saline solution, ideal for the management, cleaning and preparation of venous accesses. The French branch also distributes infusion pumps for diseases such as Parkinson's and immunoglobulins.

**DBM**, leader in the production of pre-filled syringes with sterile water, water and glycerin, isotonic solution, sodium citrate and sterile lubricating gel. The compositions guarantee the best solution for the maintenance and washing of catheters, allowing you to maximize the use of infusion systems while minimizing the number of non-necessary injections, to protect the most fragile and elderly patients.

**Adria Med**, specialized in unique and innovative elastomeric pumps. Easyflow is the only completely soft elastomeric infusion system for drug administration, used for continuous infusion via intravenous, intra-arterial, epidural and subcutaneous routes. Particularly suitable for use with patients undergoing chemotherapy, for the treatment of acute or chronic pain, for hydration and antibiotic therapies, also particularly suitable for fragile patients, in all stages of life, especially at an advanced age. The innovative design of this elastomeric pump guarantees the administration of the drug, while guaranteeing a good lifestyle for the patient who is not forced into immobility during the infusion.

**BEL** designs, develops, produces and distributes certified medical devices, with particular reference to vascular access and disposable medical devices for Cardiac Surgery, Urodynamics, Gynecology and Extracorporeal Circulation.

**Securmed** produces and distributes medical devices for urology, gastroenterology, anesthesia, oxygen therapy and surgery.

“The constant search for safe and quality solutions allows the Group to be a point of reference in the global market. Listening to healthcare professionals and providing them with the best possible solution to ensure optimal performance and high-quality patient care are the foundations of our group” concludes Giovanelli.

Research and development, prototyping and testing, very high safety standards are therefore the strengths of NUMANTEC, a cutting-edge company, rooted both nationally and internationally, in a **niche sector that aims to increase the well-being of patients with particular attention towards people of advanced age.**
