The Metropolitan City of Cagliari (CMCA) is a local authority in Sardinia, Italy, committed to sustainable development, social cohesion, and economic growth. Through its **Sustainable Urban Mobility Plan (SUMP)**, CMCA enhances connectivity while reducing environmental impact. Initiatives like the Biciplan, a cycling mobility plan, and the creation of mobility hubs showcase its innovative approach to accessible transport systems.

The role in EMBRACER

In EMBRACER, the Metropolitan City of Cagliari leverages its expertise in implementing sustainable mobility strategies through the SUMP. It designs policies and infrastructures to promote active and shared mobility, such as cycling paths and intermodal hubs, while integrating urban and suburban networks. By engaging stakeholders and using data-driven methods, the city enhances transport policies and addresses local needs. Its participation underscores a commitment to advancing Mediterranean mobility planning through innovation and collaboration.

The importance of being part of EMBRACER

Participation in EMBRACER enables the Metropolitan City of Cagliari to strengthen its SUMP by exchanging best practices with international partners. It gains insights to improve initiatives like the Biciplan and mobility hubs, fostering eco-friendly and inclusive mobility. This collaboration drives innovation in policy design, better connecting urban and rural areas while promoting interregional cooperation. By addressing shared challenges together with its partners, the city aims to make a meaningful contribution to sustainable development and mobility improvements in Europe.
