WORK PLAN

S1

ShareRES

KOM - ONLINE

shareRES SHaring REnewable eneRgy through Energy communities

Objectives

The main objective of ShareRES is to improve the policies that enable an active participation of citizen communities in the energy market by generating, consuming, sharing and selling electricity, as well as providing flexibility to the grid through demand-response and storage.

These improvements will achieve a democratic, sustainable and inclusive energy system, in which **energy communities** will be key for the energy transition.

ShareRES SHARing REnewable eneRgy through Energy communities

Objectives

The main objective of ShareRES is to improve the policies that enable an active participation of citizen communities in the energy market by generating, consuming, sharing and selling electricity; as well as providing flexibility to the grid through demand-response and storage.

These improvements will achieve a democratic, sustainable and inclusive energy system, in which **energy communities** will be key for the energy transition.

A day to mark on our calendar:
 On March 22, 2023, we had our first interaction at the Kick-Off Meeting (KOM), where we got to know our partners better and understand their concerns regarding the ShareRES project.

IE1_ Badajoz

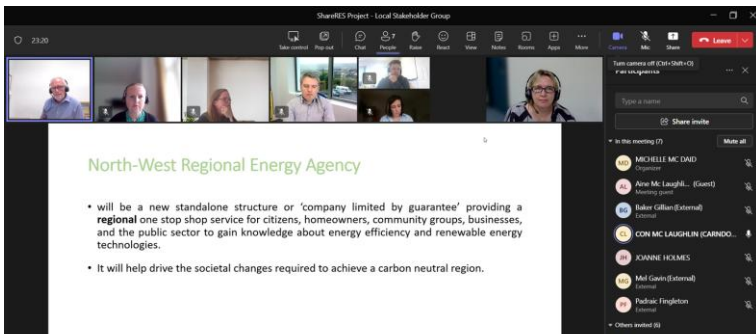

The 1st Interregional event in Badajoz emphasized the significance of 'Exchange of experience' across our consortium and the Interreg framework.

WORK PLAN S1

LSM 1

We've made progress in regional learning with the LSMs.
This meeting was delayed until Sept-Oct 2023 (beginning of S2)
For further information don't hesitate to check our library.
