

European Union

Ongoing Cooperation in Moldova

Energy

An abstract graphic on the left side of the slide consists of a series of white dots forming a curved, wave-like shape. A bright orange and yellow light streak cuts through the dots, creating a sense of motion and energy.

1 billion

EU, member state, and international
funding in loans and grants

interconnections

large construction projects that
support energy connectivity between
Moldova with Romania

Ungheni-Iasi gas pipeline

Balti-Suceava overhead power line

district heating

upgrades to heating systems,
including new in-building networks;
and construction of modern heating
stations and new pumping stations,

Termoelectrica

energy efficiency

renovation of public and residential
buildings and support energy efficient
equipment

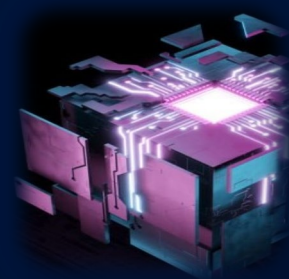

School, kindergartens,
hospitals

Eco_Vouchers to obtain energy
efficient refrigerators and washing
machines

power grid modernisation

upgrade power grid by replacing high-voltage switchgear units, medium-voltage bays, and transformers in order to improve reliability and reduce energy losses

Moldoelectrica

business

support the government's treasury

energy cost support
for businesses in
2025

european village

support the government's treasury

support local
authorities on
energy efficient
initiatives in 2025

*street lighting, public building
renovations*

people

support the government's treasury

support for
vulnerable people's
heating and
electricity costs
from 2021 to 2025

WAY FORWARD

more energy efficiency

Invest in renewable energy

Growth Plan

new interconnections

increase balancing capacity
