

On The NonHaz(ardous)City3 Project

2023-2025

Interreg
Baltic Sea Region

Co-funded by
the European Union

SUSTAINABLE WATERS

NonHazCity 3

The overall goal

- More than 40 partners from all the Baltic Sea Countries
- Aim: To minimize the use of hazardous substances in the built environment, thus increasing the indoor health and enable reuse and lower CO2-emissions
- Partners: Baltic Development Forum, Municipalities – Stockholm, Helsinki, Riga, Tallin and more: Total more than 40 partners.

Practical learnings for Holbæk

- DGNB Gold certified Kindergarten; Jyderup Børnehus
- Assessment of building materials in Byggvarubedömningen
- Checking rating/smilies

Rekommenderas

Accepteras

Undviks

- Compare chemical criteria in green building standard

Practical learnings for Holbæk

- No severe deviant building materials after BVB assessment
- The Municipality will continue DGNB Gold certification on all new buildings over 1000m²
- Lack of quality control of data
- The Municipality is now in the process of implementing new guidelines for data management in construction projects, following the results from the NHC project
- Improving the log-book for our buildings

The step by step guide to

- Initiative that Holbæk has further contributed:
- The step by step guide to NonHazardous buildings
- The movie to raise awareness about the guide – in all languages of the Baltic
- Here it is
