A SUSTAINABLE ENERGY STRATEGY

Regional Government of Extremadura as key stakeholder (MA)

Definition of regional sustainable ENERGY MODEL
Management of NATURAL RESOURCES
Objectives for CLIMATE CHANGE
Role of CITIZENS and MUNICIPALITIES
Job CREATION

RES for self-consumption

Sustainable mobility

Energy poverty mitigation

Extremadura's Strategy for Green and Circular Economy 2030

It defines a roadmap for the transition to a low-carbon economy with the final goal of creating a greener region.

It boosts the green and circular economy in the region as the best way to achieve a sustainable development.

EXTREMADURA 2030

Relevant players:

Regional Ministry for Environment and Rural Affairs

Regional Ministry for Ecological Transition and Sustainability

170.000 green jobs

100.000 hectares of ecologic agriculture

300 ecologic livestock holdings

Multiple events

POTENTIAL FOR LEARNING

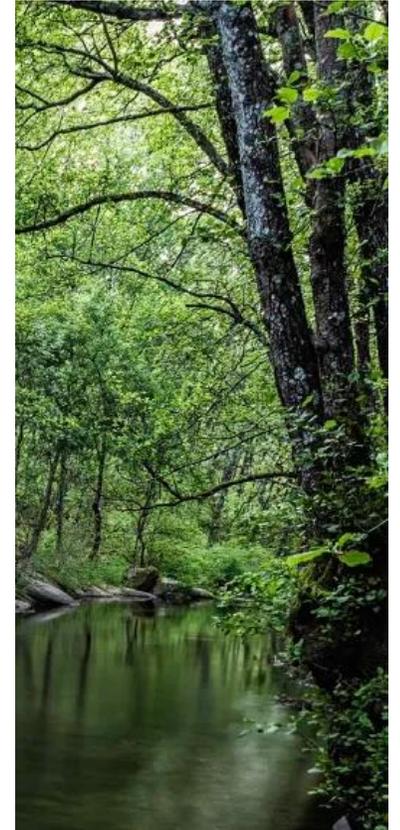

900 actions have already been carried out in Extremadura.

There is a high potential for learning or transfer as it deals with the need of any region to achieve the energy transition – it has to be done through a holistic approach.

Extremadura 2030's website acts as a platform that gives and is feed with all the related information.

<https://extremadura2030.com/>

Since 2020 it will support the Regional Energy and Climate Plan
Plan Extremeño Integrado de Energía y Clima - PEIEC

Thank you!
