Locations for cargo bike hubs

Collaborative planning is the key

Cargo bikes are an important piece in urban sustainable transformation

CC: Philipp Böhme

CC: Martin Randelhoff

Key measures to speed up cycle logistics

1. Set up a work group with stakeholders, meet regularly and produce results
2. Be flexible, start straightforwardly, learn and iterate
3. Impose access regulations, (ultra-) low emission zones or car free districts
4. Provide affordable and well-located space for logistics and micro-hubs
5. Hire logistics expertise for you planning department
