eBus Readiness Indicator Tool

Short description of the tool
The tool was developed by e-Bussed *Thematic Working Group 1: Drivers and Barriers*. The objective was to compile a set of readiness indicators and create an easy-to-use tool to assist public and private stakeholders in assessing the present conditions of their region regarding the introduction of electric buses and the provision of related infrastructure.

Thematic article
In order to fully understand the background of the tool and how it can be utilized, please read the thematic article *Readiness indicators to electric bus deployment.*

Where to get the tool
You can download the development version by clicking this link.

Technical requirements
The tool is built with Microsoft Excel and a version of Excel is required to run it. To be able to use the quick filtering buttons, macros need to be enabled for the workbook. However, using the tool is also possible with out macros and quick filtering.

Example file
One example of how the tool can be used can be found here.
